Table 24: Long-run Returns for Dual Class and Single Class IPOs, 1980-2024
Figure 1: Percentage of Operating Company IPOs that Are Tech Stocks, 1980-2025
Figure 2: Percentage of IPOs with Negative Trailing 12-month Earnings (EPS), 1980-2025
Figure 3: Mean and Median Public Float, 1980-2025
Figure 4: Average First-day Return and Aggregate Amount of Money Left on the Table, 1990-2025
Figure 5: Number of IPOs and Average First-day Return, 1980-2025
Figure 6: Number and Percentage of U.S. IPOs from Chinese Companies, 1993-2025

90 operating companies went public in the U.S. in 2025, excluding ADRs, natural resource limited partnerships and trusts, closed-end funds, REITs, SPACs, banks and S&Ls, unit offers, small best efforts deals, penny stocks (offer price of less than $5 per share), and stocks not listed on Nasdaq or the NYSE (including NYSE MKT LLC, the former American Stock Exchange). Of these 90 operating companies, 67 were from the U.S. A higher IPO volume figure has been reported in many sources (at least 352 counting all offerings), but the higher numbers typically include not only operating companies (mostly domestic), but also ADRs (8 offerings, of which 5 were penny stocks), some companies that were already traded in other countries and are thus actually follow-on offerings, unit offerings (2 offerings, both of which were penny stocks), IPOs that do not trade on the NYSE (including NYSE American) or Nasdaq (0 offerings), IPOs with an offer price below $5.00 (109 offerings, including 5 that were also ADRs and 2 that were unit offers), and small best efforts deals (1 offering of penny stock), banks and S&Ls (4 offerings, most of which are typically mutual conversions with depositors buying the stock), oil & gas partnerships or unit trusts (0 offering), REITs (2 offerings), 144 special purpose acquisition companies (SPACs), and 0 closed-end funds (not including interval funds listed at cefa.com). There were also 9 direct listings, all of which were by relatively small companies. There are also several bulletin board-traded issues or foreign stocks that I (and Dealogic) classify as follow-ons, and thus don't count, but which LSEG classifies as IPOs. Marco Pizarro assisted in the update of the figures. Rui Guo assisted in the updates of the long-term return and turnover tables.

**Note:** Some of the tables may have slightly different counts for the number of IPOs in some years. These inconsistencies are because I periodically add or delete a company that had been misclassified or find some missing data. I do not immediately update every table. I rely on data from the LSEG SDC new issues database (previously known as Refinitiv and Thomson Reuters) and Dealogic, but also use information from IPOScoop.com, Nasdaq, Renaissance Capital, the prospectuses, and other sources. For IPOs from June 1996 and later, the prospectuses (S.E.C. form 424B) are available on EDGAR. For IPOs from 1975-1996 (the pre-EDGAR days), I have most of the original paper prospectuses courtesy of Graeme Howard and Todd Huxster. For foreign IPOs from 1996-2000, the S.E.C. did not require electronic filing, so they are not available on EDGAR, but I have the paper copies for many of them.

In almost all of my tables, I use a more conservative definition of what is an IPO than most other data providers, but am consistent over time. Partly, the definition that is appropriate depends upon what one is focusing on. From an underwriter's point of view, anything that generates fees is relevant. I exclude some of these categories (such as LPs) partly because it is difficult to determine the founding date of the underlying assets, and I do not like to have a different number of firms in different tables. Another motivation is that I am focusing on operating companies that potentially create jobs. For 2016, I have included BATS Global Markets, which went public in April, but was listed on BATS before being acquired by CBOE Holdings in 2017.

**Table 1: Mean First-day Returns and Money Left on the Table, 1980-2025** (July 13, 2026)

The sample is IPOs with an offer price of at least $5.00, excluding ADRs, unit offers, SPACs, closed-end funds, REITs, natural resource limited partnerships, small best efforts offers, banks and S&Ls, and stocks not listed on CRSP (CRSP includes Amex, NYSE, and NASDAQ stocks). Proceeds exclude overallotment options. The amount of money left on the table is defined as the closing market price on the first day of trading minus the offer price, multiplied by the shares offered.

| | | Mean First-day Return | | Median | Aggregate | |
|---|---|---|---|---|---|---|
| Year | Number of IPOs | Equal-weighted | Proceeds-weighted | First-day Return | Amount Left on the Table | Aggregate Proceeds |
| 1980 | 71 | 14.3% | 20.0% | 6.9% | $0.18 billion | $0.91 billion |
| 1981 | 192 | 5.9% | 5.7% | 0.3% | $0.13 billion | $2.31 billion |
| 1982 | 77 | 11.0% | 13.3% | 3.7% | $0.13 billion | $1.00 billion |
| 1983 | 451 | 9.9% | 9.4% | 2.5% | $0.84 billion | $8.89 billion |
| 1984 | 171 | 3.7% | 2.5% | 0.0% | $0.05 billion | $2.02 billion |
| 1985 | 186 | 6.4% | 5.6% | 2.8% | $0.23 billion | $4.09 billion |
| 1986 | 393 | 6.1% | 5.1% | 1.1% | $0.68 billion | $13.40 billion |
| 1987 | 285 | 5.6% | 5.7% | 1.3% | $0.66 billion | $11.68 billion |
| 1988 | 105 | 5.5% | 3.4% | 2.3% | $0.13 billion | $3.88 billion |
| 1989 | 116 | 8.0% | 4.7% | 4.0% | $0.27 billion | $5.81 billion |
| 1990 | 110 | 10.8% | 8.1% | 5.6% | $0.34 billion | $4.24 billion |
| 1991 | 286 | 11.9% | 9.7% | 7.5% | $1.50 billion | $15.39 billion |
| 1992 | 412 | 10.3% | 8.0% | 4.4% | $1.82 billion | $22.69 billion |

| **1980-2025** | **9,344** | **19.0%** | **16.5%** | **13.0%** | **$1,200 billion** | **$8,072 billion** |

**Table 2** (updated January 1, 2026)

**Mean First-day Returns, Categorized by Sales, for IPOs from 1980-2025**

Sales, measured in millions, are for the last twelve months prior to going public. All sales have been converted into dollars of January 2024 purchasing power, using the Consumers Price Index. There are 9,343 IPOs, after excluding IPOs with an offer price of less than $5.00 per share, units, REITs, SPACs, ADRs, closed-end funds, banks and S&Ls, small best efforts offers, firms not listed on CRSP within six months of the offering, and natural resource limited partnerships. Sales are from the LSEG's new issues database and its predecessors, EDGAR, and the Graeme Howard-Todd Huxster collection of pre-EDGAR prospectuses. The average first-day return is 18.8%.

| | 1980-1989 | | 1990-1998 | | 1999-2000 | | 2001-2025 | |
|---|---|---|---|---|---|---|---|---|
| | Return | N | Return | N | Return | N | Return | N |
| 0≤sales<$10m | 10.7% | 309 | 16.8% | 559 | 65.7% | 233 | 20.4% | 678 |

**Table 3** (updated February 20, 2026)

**IPO Turnover Categorized by Decade and First-Day Return, 1983-2025**

IPOs with an offer price below $5.00 per share, unit offers, closed-end funds, REITs, bank and S&L IPOs, SPACs, natural resource limited partnerships, small best efforts offers, all foreign companies, and those with missing volume numbers on CRSP (3 IPOs) are excluded. Turnover is defined as the maximum of the first three days' CRSP trading volume divided by the number of shares issued (not including the overallotment option). The highest of these first three days is almost always the first day. For Nasdaq-listed IPOs, the trading volume is divided by 2 for January1983-January 2001, by 1.8 for February 2001-December 2001, and by 1.6 for 2002-2003 to allow more meaningful comparisons with NYSE and Amex (now NYSE MKT)-listed IPOs. As explained in Appendix B of Gao and Ritter's 2010 *Journal of Financial Economics* article "The Marketing of Seasoned Equity Offerings," in 2001, Nasdaq changed its trade-reporting rules, and in 2002, institutions changed the way they reported Nasdaq trades. IPOs before 1983 are not included because CRSP has volume for very few of these stocks. For 36 IPOs in the 1980s and 1990s, the observation is deleted because the (adjusted) turnover is less than 1%.

For Republic Airways Holding (20040526), the CRSP volume of 131,952 is replaced with Bigcharts volume of 1,203,600; for Nucryst Pharmaceuticals (20051222), the CRSP volume of 49,056 is replaced with Bigcharts volume of 714,500; for Stevanto Group (20210716) the CRSP volume of 49 is replaced with e BigCharts volume of 12,538,610. For BATS Global Markets (20160415), which is listed on BATS, Yahoo Finance is the source of volume and long-run returns, and I have created a CRSP PERM of 12345 for it. For Grove (20210623) and Hempacco (20220830), both Nasdaq Capital Markets issues, the first-day volume has been used instead of the 2nd or 3rd day volume, for which turnover exceeded 1,500%. For Scopus Biopharma (20201216), the first-day volume is also used.

Panel A: Percentage of U.S. Operating Company IPOs with Turnover Greater Than 100%

| Time Period | Number of IPOs | Percentage with Turnover>100% | Percentage of IPOs on Nasdaq |
|---|---|---|---|
| 1983-1989 | 1,654 | 0.0% | 87.2% |
| 1990-1998 | 3,412 | 1.1% | 83.5% |
| 1999-2000 | 786 | 21.4% | 91.5% |
| 2001-2025 | 2,464 | 15.5% | 67.2% |
| Total | 8,316 | 7.1% | 80.3% |

Panel B: Average Adjusted Turnover Categorized by First-Day Returns

| Return Categories | Number of IPOs | Average First-Day Returns | Average Turnover |
|---|---|---|---|
| Return ≤ 0% | 2,343 | -3.7% | 34.1% |
| 0% < Return ≤ 10% | 2,275 | 4.5% | 32.9% |
| 10% < Return ≤ 60% | 3,053 | 25.9% | 53.9% |
| Return > 60% | 645 | 125.4% | 100.5% |

Panel C: Average Adjusted Turnover Categorized by First-Day Returns & Decade

| Return Categories | 1983-1989 | 1990-1998 | 1999-2000 | 2001-2025 |
|---|---|---|---|---|
| Return ≤ 0% | 15.0% | 25.7% | 52.5% | 60.2% |
| 0% < Return ≤ 10% | 18.3% | 28.8% | 53.9% | 51.8% |
| 10% < Return ≤ 60% | 22.2% | 45.6% | 70.8% | 72.0% |
| Return > 60% | 26.7% | 84.4% | 101.3% | 118.6% |
| Total | 17.9% | 37.1% | 76.3% | 68.1% |

**Table 3b** (updated February 20, 2026)

**Mean First-day Turnover for NYSE and Nasdaq IPOs, 1983-2025**

The sample is composed of the IPOs of U.S.-based companies with an offer price of at least $5.00 and listed on the NYSE (excluding NYSE American and NYSE MKT issues after the merger in 2008) or Nasdaq (excluding Nasdaq small cap issues before October 2005 and, after Sept. 2005, Nasdaq capital market issues), excluding ADRs, unit offers, SPACs, closed-end funds, REITs, natural resource limited partnerships, small best efforts offers, banks and S&Ls, and stocks not listed on CRSP (CRSP includes Amex, NYSE, and NASDAQ stocks). Turnover is volume divided by shares issued. Volume is the maximum of the first three days, which is almost always the first day. Shares issued excludes over allotment options, but includes the global offering size. To adjust for institutional features of the way that Nasdaq and NYSE-Amex volume are computed, we use the procedure discussed in Appendix B of Xiaohui Gao and Jay Ritter's 2010 *Journal of Financial Economics* article "The Marketing of Seasoned Equity Offerings." Prior to February 1, 2001, we divide Nasdaq volume by 2.0. This accounts for the practice of counting as trades both trades with market makers and trades among market makers. On February 1, 2001, a "riskless principal" rule went into effect, that resulted in a reduction of approximately 10% in reported volume. Thus, for February 1, 2001 to December 31, 2001, we divide Nasdaq volume by 1.8. During 2002, securities firms began to charge institutional investors commissions on Nasdaq trades, rather than the prior practice of merely marking up or down the net price, resulting in a further reduction in reported volume of approximately 10%. Thus, for 2002 and 2003, we divide Nasdaq volume by 1.6. For 2004 and later years, in which much of the volume of Nasdaq (and NYSE) stocks has been occurring on crossing networks and other venues, we use a divisor of 1.0, reflecting the fact that there are no longer important differences in the reporting of Nasdaq and NYSE volume. 36 IPOs from the 1980s and 1990s with adjusted first-day turnover of less than 1% of the issue size are excluded.

For one small Nasdaq IPO from 2020 (Scopus Biopharma), for which 2$^{nd}$ day turnover was more than 1,800%, the first-day turnover is used rather than the maximum of the first three days.

| Year | Number of IPOs | | | Unadjusted | | | With Nasdaq Adjustment | |
|---|---|---|---|---|---|---|---|---|
| | Total | NYSE | Nasdaq | Total | NYSE | Nasdaq | Nasdaq | Total |
| 1983 | 429 | 11 | 418 | 24.1% | 17.6% | 24.5% | 12.2% | 12.4% |
| 1984 | 156 | 8 | 148 | 21.9% | 10.9% | 23.1% | 11.5% | 11.5% |

**Table 4** (updated April 24, 2026)

**Median Age and Fraction of IPOs with VC and Buyout Backing, 1980-2025**

There are 9,345 IPOs after excluding those with an offer price below $5.00 per share, unit offers, ADRs, closed-end funds, oil & gas limited partnerships, special purpose acquisition companies (SPACs), REITs, bank and S&L IPOs, small best efforts offers, and firms not listed on CRSP within 6 months of the IPO. Missing numbers are supplemented by direct inspection of prospectuses on EDGAR, information from Dealogic for IPOs after 1991, Howard and Co.'s *Going Public: The IPO Reporter* from 1980-1985, the Graeme Howard-Todd Huxster collection of IPO prospectuses for 1975-2006, and the Stanford GSB microfiche collection of registration statements form the 1980s. Tech stocks are defined as internet-related stocks plus other technology stocks, not including biotech. Loughran and Ritter (2004) list the SIC codes in their appendix 3 and sources of founding dates in appendix 1. Age is defined as the year of the IPO minus the year of founding. For buyout-backed IPOs, the founding date of the predecessor company is used. For rollups, the founding date of the oldest acquired company is used in most cases. Private equity (PE) or buyout-backed IPOs were restricted to "reverse LBOs" in the 1980s and 1990s. Jerry Cao has assisted with providing information on which IPOs are buyout-backed. Will Gornall and Ilya Strebulaev, among others, have assisted with providing information on venture capital-backed IPOs. Laura Field, Martin Kenney, Alexander Ljungqvist, Don Patton, and Bill Wilhelm, among others, have assisted with providing information on the year of founding.

The financial backers of some companies are easy to classify, such as when Sequoia Capital and Kleiner Perkins invested in Google, or when KKR invested in Dollar General. But other situations involve growth capital investing (including buildups), as when Warburg Pincus finances a company that rolls up some doctors' offices. With just two categories (VC and buyout), there is some arbitrariness in the categorization of IPOs backed by growth capital investors. 472 growth capital-backed IPOs are classified as VC-backed.

The last column gives the percentage of tech stocks that have VC backing.

The definition of technology stocks has been changed from that in Loughran and Ritter (2004 *Financial Management*), with SIC=3559, 3576, and 7389 added to tech. Some 7389 (business services) companies have had their SIC codes changed into non-tech categories, such as consulting and two new SIC codes: 5614 for telemarketing firms and 7388 for non-tech business services such as Sotheby's Auctions.

In April 2024, an IPO in 2017 and one in 2024 were added to this table and five companies were reclassified as VC-backed.

(table on the next page)

| Year | Number of IPOs | Median Age | VC-backed | | Buyout-backed | | Technology IPOs | |
|---|---|---|---|---|---|---|---|---|
| | | | No. | % | No. | % | No. | % VC-backed |
| 1980 | 71 | 6 | 23 | 32% | 1 | 1% | 22 | 64% |
| 1981 | 192 | 8 | 53 | 28% | 1 | 1% | 72 | 40% |
| 1982 | 77 | 5 | 21 | 27% | 2 | 3% | 42 | 36% |

**Table 4a** (updated December 30, 2025)

**Technology Company IPOs, 1980-2025 including Direct Listings**

There are 3,365 IPOs and 13 direct listings that are tech stocks, for a total of 3,378 listings, after excluding those with an offer price below $5.00 per share, unit offers, ADRs, closed-end funds, natural resource limited partnerships (and most other LPs, but not buyout firms such as Carlyle Group), acquisition companies, REITs, bank and S&L IPOs, and firms not listed on CRSP. Missing and questionable numbers from the SDC new issues database are supplemented by direct inspection of prospectuses on EDGAR, information from Dealogic for IPOs after 1991, Howard and Co.'s *Going Public: The IPO Reporter* from 1980-1985, and the Graeme Howard-Todd Huxster collection of IPO prospectuses for 1975-2006. Tech stocks are defined as internet-related stocks plus other technology stocks including telecom, but not including biotech. Loughran and Ritter (2004) list the SIC codes in their appendix 3 and sources of founding dates in appendix 1. The definition of technology stocks has been changed from that in Loughran and Ritter (2004 *Financial Management*), with SIC=3559, 3576, 3760, 3844, and 7389 added to tech. Some 7389 (business services) companies have had their SIC codes changed into non-tech categories, such as consulting and two new SIC codes that I have made up: 5614 for telemarketing firms and 7388 for non-tech business services such as Sotheby's Auctions. I have also added the S.E.C.'s computer communications equipment code of 3576 for 21 companies, including Cisco Systems.

For the column with VC-backed IPOs, there are 3,799 IPOs including both technology and non-technology companies.

Total proceeds are nominal and do not include overallotment shares, and are zero for direct listings. Price-to-sales ratios are computed using both the offer price (OP) and the first closing market price (MP) for computing the market capitalization of equity. Market cap is calculated using the post-issue shares outstanding, with all share classes included in the case of dual-class companies. The undiluted number of shares is used, which is some cases (e.g., Facebook, Twitter, and Castlight Health) understates the market cap due to the existence of substantial amounts of in-the-money employee stock options that are highly likely to be exercised. Sales are the last twelve months (LTM) revenues as reported in the prospectus. The median sales, in millions, is expressed in both nominal dollars and in dollars of 2024 purchasing power using the CPI (multiply realsales by 1.03 if you want to convert into 2025 purchasing power). The median age, in years, is the number of years since the calendar year of the founding date and the calendar year of the IPO. The percentage of IPOs that are profitable measures profitability using trailing LTM earnings (usually using after extraordinary items earnings, and usually using pro forma numbers that are computed assuming that any recent or concurrent mergers have already occurred, and the conversion of convertible preferred stock into common stock). In some cases, last fiscal year earnings are used when LTM earnings are unavailable.

Even concepts like market cap (for the price-to-sales ratios) become ambiguous when you realize that companies like Facebook have many deep in-the-money options outstanding, so whether you use the fully diluted number of shares or the undiluted number can affect the calculations substantially for some companies.

(table on the next page)

| Year | Number of Tech IPOs | Proceeds in $millions | | Median Price-to-sales | | Median sales, $mm | | Median age | % profitable |
|---|---|---|---|---|---|---|---|---|---|
| | | VC-backed | Technology | OP | MP | Nominal | $2024 | | |

**Table 4b** (updated December 30, 2025)

**Technology and Life Science Company IPOs, 1980-2025**

There are 3,365 tech and 1,031 life science IPOs from 1980-2025 (not including direct listings), after excluding those with an offer price below $5.00 per share, unit offers, ADRs, closed-end funds, partnerships, acquisition companies, REITs, bank and S&L IPOs, and firms not listed on CRSP. Life science includes biotech and pharmaceutical firms. Life science is defined as SIC=2830, 2834, 2835, 2836, and 8731. In prior years, I had included 2833 (medical chemicals and botanical products) as well, but I am not including this industry in life science since in recent years it has been mainly cannabis-related companies.

Tech stocks are defined as internet-related stocks plus other technology stocks including telecom, but not including biotech. Loughran and Ritter (2004) list the SIC codes in their appendix 3 and sources of founding dates in appendix 1. The definition of technology stocks has been changed from that in Loughran and Ritter (2004 *Financial Management*), with SIC=3559, 3576, and 7389 added to tech. Some 7389 (business services) companies have had their SIC codes changed into non-tech categories, such as consulting and two new SIC codes that I created: 5614 for telemarketing firms and 7388 for non-tech business services such as Sotheby's Auctions. I have also added the S.E.C.'s computer communications equipment code of 3576 for 21 companies, including Cisco Systems.

Missing and questionable numbers from the SDC new issues database are supplemented by direct inspection of prospectuses on EDGAR, information from Dealogic for IPOs after 1991, Howard and Co.'s *Going Public: The IPO Reporter* from 1980-1985, and the Graeme Howard-Todd Huxster collection of IPO prospectuses for 1975-2006.

Sales are the last twelve months (LTM) revenues as reported in the prospectus. The median sales, in millions, are expressed in dollars of 2022 purchasing power using the CPI. Pro forma numbers are usually used if there have been recent mergers or mergers that coincide with the IPO. The percentage of IPOs that are profitable measures profitability using trailing LTM earnings (usually using after extraordinary items earnings, and usually using pro forma numbers that are computed assuming that any recent or concurrent mergers have already occurred, and the conversion of convertible preferred stock into common stock). In some cases, last fiscal year earnings are used when LTM earnings are unavailable.

(table on the next page)

**Table 4c** (updated June 18, 2026)

**VC-backed, Growth Capital-backed, and Buyout-backed IPOs, 1980-2025**

There are 9,343 IPOs after excluding those with an offer price below $5.00 per share, unit offers, ADRs, closed-end funds, natural resource limited partnerships, special purpose acquisition companies (SPACs), REITs, bank and S&L IPOs, small best efforts offerings, and firms not listed on CRSP within six months of the IPO. Missing numbers in the LSEG's new issues database and its predecessors are found by direct inspection of prospectuses on EDGAR, information from Dealogic for IPOs after 1989, Howard and Co.'s *Going Public: The IPO Reporter* from 1980-1985, and the Graeme Howard-Todd Huxster collection of IPO prospectuses for 1975-1996. Some foreign company IPOs from 1997-2001 that did not use ADRs but did not file electronically, and therefore do not have a prospectus available on EDGAR, were also accessed from the Graeme Howard-Todd Huxster database. Additional information was collected from microfiches at Stanford's GSB library. Tech stocks are defined as internet-related stocks plus other technology stocks including telecom, but not including biotech. Loughran and Ritter (2004) list the SIC codes in their appendix 3 and sources of founding dates in appendix 1, and I have slightly updated the classifications.

Growth capital-backed IPOs are IPOs with a financial sponsor that, unlike a buyout-sponsored deal, typically owns far less than 90% of the equity prior to the IPO. Furthermore, many growth capital-backed IPOs have debt in their capital structure. The main criteria for classifying a financial sponsor as growth capital rather than venture capital is whether the company is investing in tangible assets (e.g., stores or hospitals) or intangibles (e.g., R&D); this is highly correlated with the industry of the company: restaurants, retail operations such as clothing store chains, healthcare operations (doctors' offices and dental offices), and retirement homes are generally classified as growth capital-backed. Many growth capital-backed IPOs are involved in rollups of a fragmented industry, where the financial sponsor has provided capital to make acquisitions to consolidate a fragmented industry, such as funeral homes. If a company is growing via acquisitions, it would generally be categorized as growth capital-backed rather than venture-backed. Jerry Cao has provided some information on which IPOs are buyout-backed. 482 growth capital-backed IPOs are not classified as VC-backed in this table. See my article "Growth Capital-backed IPOs" in *The Financial Review* (November 2015) for further details.

**Table 4d** (updated March 17, 2026)

**VC-backed IPOs, U.S.-headquartered Companies Only, 1980-2025**

There are 3,615 venture capital-backed IPOs of U.S. headquartered companies, after excluding those with an offer price below $5.00 per share, unit offers, ADRs, closed-end funds, natural resource limited partnerships (and most other LPs, but not buyout firms such as Carlyle Group), acquisition companies, REITs, bank and S&L IPOs, and firms not listed on CRSP. VC-backed includes growth capital-backed IPOs. Missing and questionable numbers from the SDC new issues database are supplemented by direct inspection of prospectuses on EDGAR, information from Dealogic for IPOs after 1991, Howard and Co.'s *Going Public: The IPO Reporter* from 1980-1985, and the Graeme Howard-Todd Huxster collection of IPO prospectuses for 1975-1996.

The public float is calculated as the shares issued multiplied by the first closing market price, and does not include overallotment shares. All numbers use the undiluted number of shares outstanding. For dual-class companies such as Facebook, all share classes are included, with the assumption that the price per share is the same for each class.

Even concepts like market cap (for the price-to-sales ratios) become ambiguous when you realize that companies like Facebook have many deep in-the-money options outstanding, so whether you use the fully diluted number of shares or the undiluted number can affect the calculations substantially for some companies.

Example: For 1980, the 23 VC-backed IPOs raised a total of $388 million (not including overallotment options), the shares of which had a market cap of $500 million using the first closing market price. The market cap, using all shares outstanding, was $3.374 billion in total. Of this, Apple Computer issued 4.6 million shares at $22 per share (proceeds of $101.2 million), closing at $28.75 per share (public float value of $132.25 million), with 55.136 million shares outstanding ($1,585 million market cap).

Adjusted for inflation, the total market cap of $3.47 trillion would translate into $5.07 trillion in terms of January 2025 purchasing power.

**Table 4g** (updated December 30, 2025)

**Life Science Company IPOs, 1980-2025**

IR is the initial return (underpricing), measured as the equally weighted average of the first-day return from the offer price to close. There are 1,031 biotech IPOs from 1980-2025, after excluding those with an offer price below $5.00 per share, unit offers, ADRs, closed-end funds, partnerships, special purpose acquisition companies (SPACs), REITs, bank and S&L IPOs, and firms not listed on CRSP. Missing and questionable numbers from the SDC new issues database are supplemented by direct inspection of prospectuses on EDGAR, information from Dealogic for IPOs after 1991, Howard and Co.'s *Going Public: The IPO Reporter* from 1980-1985, and the Graeme Howard-Todd Huxster collection of IPO prospectuses for 1975-2006.

Life science includes biotech and pharmaceutical firms, defined as SIC=2830, 2834, 2835, 2836, and 8731.

Sales are the last twelve months (LTM) revenues as reported in the prospectus. The median sales, in millions, are expressed in dollars of 2022 purchasing power using the CPI. Pro forma numbers are usually used if there have been recent mergers or mergers that coincide with the IPO. The percentage of IPOs that are profitable measures profitability using trailing LTM earnings (usually using after extraordinary items earnings, and usually using pro forma numbers that are computed assuming that any recent or concurrent mergers have already occurred, and the conversion of convertible preferred stock into common stock). In some cases, last fiscal year earnings are used when LTM earnings are unavailable. EPS is earnings per share. Age is the median age in years, defined as the calendar year of the IPO minus the calendar year of founding.

Many of the biotech companies with positive sales have research contracts producing revenue, rather than product sales.

(table on the next page)

**Table 4i** (updated January 12, 2026)

**VC-backed Tech IPOs, 1980-2025**

There are 2,027 Venture Capital-backed tech IPOs, after excluding those with an offer price below $5.00 per share, unit offers, ADRs, closed-end funds, best effort offers, natural resource limited partnerships (and most other LPs, but not buyout firms such as Carlyle Group), special purpose acquisition companies (SPACs), direct listings, REITs, bank and S&L IPOs, and firms not listed on CRSP. Missing and questionable numbers from the SDC new issues database are supplemented by direct inspection of prospectuses on EDGAR, information from Dealogic for IPOs after 1991, Howard and Co.'s *Going Public: The IPO Reporter* from 1980-1985, and the Graeme Howard-Todd Huxster collection of IPO prospectuses for 1975-2006. Tech stocks are defined as internet-related stocks plus other technology stocks including telecom, but not including biotech. Loughran and Ritter (2004) list the SIC codes in their appendix 3 and sources of founding dates in appendix 1. The definition of technology stocks has been changed from that in Loughran and Ritter (2004 *Financial Management*), with SIC=3559, 3576, 3844, and 7389 added to tech. Some 7389 (business services) companies have had their SIC codes changed into non-tech categories, such as consulting and two new SIC codes that I have made up: 5614 for telemarketing firms and 7388 for non-tech business services such as Sotheby's Auctions. I have also added the S.E.C.'s computer communications equipment code of 3576 for 21 companies, including Cisco Systems.

Price-to-sales ratios are computed using both the offer price (OP) and the first closing market price (MP) for computing the market capitalization of equity. Market cap is calculated using the post-issue shares outstanding, with all share classes included in the case of dual-class companies. The undiluted number of shares is used, which is some cases (e.g., Facebook, Twitter, and Castlight Health) understates the market cap due to the existence of substantial amounts of in-the-money employee stock options that are highly likely to be exercised. Sales are the last twelve months (LTM) revenues as reported in the prospectus. The median sales, in millions, is expressed in both nominal dollars and in dollars of 2024 purchasing power using the CPI. The median age, in years, is the number of years since the calendar year of the founding date and the calendar year of the IPO. The percentage of IPOs that are profitable measures profitability using trailing LTM earnings (usually using after extraordinary items earnings, and usually using pro forma numbers that are computed assuming that any recent or concurrent mergers have already occurred, and the conversion of convertible preferred stock into common stock). In some cases, last fiscal year earnings are used when LTM earnings are unavailable.

Even concepts like market cap (for the price-to-sales ratios) become ambiguous when you realize that companies like Facebook have many deep in-the-money options outstanding, so whether you use the fully diluted number of shares or the undiluted number can affect the calculations substantially for some companies.

(table on the next page)

| Year | Number of VC-backed tech IPOs | Median Price-to-sales | | Median sales, $mm | | Median age | % profitable |
|---|---|---|---|---|---|---|---|
| | | OP | MP | Nominal | $2024 | | |
| 1980 | 14 | 3.0 | 3.4 | 16.9 | 67.1 | 6.5 | 93% |

**Table 6** (updated January 1, 2026)
**Number of Initial Public Offerings, First-Day Return, and Revisions from the File Price Range by Cohort Year, 1990-2025**

| Cohort Year | Number of IPOs | Percentage First-day Return | Percentage of IPOs with OP < Lo | Percentage of IPOs in the Middle | Percentage of IPOs with OP > Hi |
|---|---|---|---|---|---|
| 1990 | 97 | 9.4 | 24.7 | 52.6 | 22.7 |
| 1991 | 262 | 11.2 | 19.8 | 55.3 | 24.4 |
| 1992 | 363 | 9.9 | 38.0 | 40.5 | 21.5 |
| 1993 | 461 | 11.6 | 21.3 | 54.0 | 24.7 |
| 1994 | 334 | 8.4 | 37.7 | 49.7 | 12.6 |
| 1995 | 390 | 19.9 | 19.7 | 45.4 | 34.9 |
| 1996 | 600 | 15.9 | 25.0 | 50.2 | 24.8 |
| 1997 | 421 | 13.8 | 29.9 | 45.8 | 24.2 |
| 1998 | 284 | 21.4 | 27.5 | 50.0 | 22.5 |
| 1999 | 465 | 70.5 | 14.8 | 37.2 | 48.0 |
| 2000 | 371 | 57.1 | 22.1 | 39.4 | 38.5 |
| 2001 | 78 | 14.2 | 25.6 | 56.4 | 18.0 |
| 2002 | 67 | 8.7 | 32.8 | 53.7 | 13.4 |
| 2003 | 65 | 12.4 | 15.4 | 55.4 | 29.2 |
| 2004 | 172 | 12.3 | 37.2 | 41.9 | 20.9 |
| 2005 | 161 | 10.1 | 34.2 | 42.9 | 23.0 |
| 2006 | 155 | 11.7 | 39.4 | 40.6 | 20.0 |
| 2007 | 155 | 14.5 | 32.3 | 41.3 | 26.5 |
| 2008 | 21 | 5.7 | 47.6 | 38.1 | 14.3 |
| 2009 | 42 | 10.8 | 33.3 | 40.5 | 26.2 |
| 2010 | 97 | 9.4 | 48.5 | 39.2 | 12.4 |
| 2011 | 81 | 14.1 | 37.0 | 30.9 | 32.1 |
| 2012 | 100 | 17.6 | 42.0 | 33.0 | 25.0 |
| 2013 | 161 | 20.5 | 29.8 | 42.2 | 28.0 |
| 2014 | 218 | 14.3 | 44.0 | 39.0 | 17.0 |
| 2015 | 123 | 18.9 | 35.8 | 38.2 | 26.0 |
| 2016 | 75 | 14.4 | 33.3 | 57.3 | 9.3 |
| 2017 | 111 | 11.8 | 23.4 | 60.4 | 16.2 |
| 2018 | 136 | 18.4 | 16.9 | 61.8 | 21.3 |
| 2019 | 113 | 23.3 | 15.9 | 57.5 | 26.5 |
| 2020 | 153 | 42.4 | 7.2 | 50.3 | 42.5 |
| 2021 | 293 | 24.6 | 18.1 | 56.3 | 25.6 |
| 2022 | 27 | 33.8 | 25.9 | 66.7 | 7.4 |
| 2023 | 31 | 6.9 | 32.2 | 48.4 | 19.4 |
| 2024 | 59 | 12.4 | 17.0 | 61.0 | 22.0 |
| 2025 | 80 | 23.2 | 16.2 | 51.3 | 32.5 |
| **1990-2025** | **6,822** | **21.6** | **26.8** | **47.0** | **26.2** |

Banks and S&Ls are included in this table, which excludes IPOs with a midpoint of the original file price range of less than $8.00, as well as unit offers, small best efforts offers, ADRs, closed-end funds, REITs, partnerships, SPACs, and stocks not listed on CRSP (CRSP includes firms listed on the NYSE, Amex (now NYSE MKT) and NYSE Arca, and NASDAQ). If a $5.00 offer price screen was used instead of the $8.00 midpoint screen, the sample size would increase by, for example, 20 IPOs in 1999 and 23 in 2023. Lo and Hi are the minimum and maximum of the original file price range. Because the average first-day return is different on the firms that are retained or added than on those that are deleted, the 6.9% average first-day return in 2023 is less than the 11.9% reported in other tables, such as Table 1.

**Table 7 (updated January 1, 2026)**

## Percentage of IPOs relative to file price range:

| | Below | Within | Above |
|---|---|---|---|
| 1980-1989 | 30% | 57% | 13% |
| 1990-1998 | 27% | 49% | 24% |
| 1999-2000 | 18% | 38% | 44% |
| 2001-2019 | 33% | 45% | 22% |
| 2020-2025 | 16% | 55% | 29% |
| | | | |
| 1980-2025 | 28% | 49% | 23% |

## Average first-day returns relative to offer price categorized by file price range:

| | Below | Within | Above |
|---|---|---|---|
| 1980-1989 | 0% | 6% | 20% |
| 1990-1998 | 4% | 11% | 31% |
| 1999-2000 | 8% | 26% | 122% |
| 2001-2019 | 3% | 12% | 38% |
| 2020-2025 | 6% | 21% | 51% |
| | | | |
| 1980-2025 | 3% | 12% | 50% |

The sample used in this table is described in Table 6. A file price range midpoint of $8 rather than an offer price of $5 is used as a screen, and banks and S&Ls are included.

**Table 8** (updated January 6 2026)
**Number of Offerings, Average First-day Returns, and Gross Proceeds of Initial Public Offerings in 1960-2025**

Data from 1960-1974 is taken from Table 1 of Roger Ibbotson, Jody Sindelar, and Jay R. Ritter's 1994 *Journal of Applied Corporate Finance* article "The Market's Problems with the Pricing of Initial Public Offerings" Vol. 7, No. 1 (Spring 1994), pp. 66-74. Data from 1975-2021 are compiled by Jay R. Ritter using the LSEG's new issues database and its predecessors, Dealogic, IPOScoop.com, and other sources. The 1975-1993 numbers are different from those reported in the 1994 *JACF* article because the published article included IPOs that did not qualify for listing on Nasdaq, the Amex, or NYSE (mainly penny stocks). Unlike other tables, bank and S&L IPOs are included in the counts in this table.

| Year | Number of Offerings[1] | Average First-day Return[2] | Gross Proceeds, $ Millions[3] |
|---|---|---|---|
| 1960 | 269 | 17.8% | 553 |
| 1961 | 435 | 34.1% | 1,243 |
| 1962 | 298 | -1.6% | 431 |
| 1963 | 83 | 3.9% | 246 |
| 1964 | 97 | 5.3% | 380 |
| 1965 | 146 | 12.7% | 409 |
| 1966 | 85 | 7.1% | 275 |
| 1967 | 100 | 37.7% | 641 |
| 1968 | 368 | 55.9% | 1,205 |
| 1969 | 780 | 12.5% | 2,605 |
| 1970 | 358 | -0.7% | 780 |
| 1971 | 391 | 21.2% | 1,655 |
| 1972 | 562 | 7.5% | 2,724 |
| 1973 | 105 | -17.8% | 330 |
| 1974 | 9 | -7.0% | 51 |

[1] Beginning in 1975, the number of offerings excludes IPOs with an offer price of less than $5.00, ADRs, small best efforts offers, units, Regulation A offers (small issues, raising less than $1.5 million during the 1980s and $5 million until 2012), real estate investment trusts (REITs), SPACs, natural resource limited partnerships, and closed-end funds. Banks and S&L IPOs are included. From 2012 and later, Regulation A offerings (issues raising up to $50 million are eligible) are included.

[2] First-day returns are computed as the percentage return from the offering price to the first closing market price.

[3] Gross proceeds exclude overallotment options but include the international tranche, if any. No adjustments for inflation have been made.

**Table 9** (updated December 30, 2025)

**Fraction of IPOs with Negative Earnings, 1980-2025**

IPOs with an offer price below $5.00 per share, unit offers, ADRs, closed-end funds, partnerships, acquisition companies, REITs, bank and S&L IPOs, and firms not listed on CRSP within six months of the offer date are excluded. When available, I use the earnings per share for the most recent twelve months (commonly known as LTM for last twelve months) prior to going public. When a merger is involved, we use the pro forma numbers (as if the merger had already occurred). I am not completely consistent in the use of earnings before or after extraordinary items. Some extraordinary items are associated with the IPO, including gains or losses on conversion of convertible securities at the time of the IPO, or writeups or writedowns associated with mergers. I usually use the before extraordinary items EPS if the one-time charges are associated with the IPO. When the trailing twelve months EPS number is unavailable, I use the most recent fiscal year EPS number. Missing numbers are supplemented by direct inspection of prospectuses on EDGAR, EPS information from Dealogic for IPOs after 1991, and Howard and Co.'s *Going Public: The IPO Reporter* from 1980-1995. Remaining missing numbers have been found in the Graeme Howard-Todd Huxster collection of IPO prospectuses and the Stanford Business School microfiche collection of prospectuses from the 1980s. Don Patton of UC-Davis has tracked down a couple of remaining missing numbers. Tech stocks are defined as internet-related stocks plus other technology stocks, not including biotech. Loughran and Ritter (2004) list the SIC codes in their appendix 3 and sources of founding dates in appendix 1. There is one IPO from 1986 with missing earnings. I assume that the earnings were positive for this firm.

| Year | Number of IPOs | No. with missing EPS | Percentage Tech Stocks | Percentage of IPOs with EPS<0 | Mean First-day Returns | |
|---|---|---|---|---|---|---|
| | | | | | EPS<0 | EPS≥0 |

**Table 10** (updated December 31, 2025)

**Gross Spreads Continue to Remain at 7% on Moderate-Size Deals**

There were 2,522 operating company IPOs during 2001-2025 raising at least $30 million ($2025) using bookbuilding, using the screens in Table 1. The 16 true auctions in 2001-2013 listed in Table 13 are not included. Proceeds numbers do not include overallotment shares.

| | Proceeds Category | |
|---|---|---|
| | $30-160 million (inflation-adjusted in 2025 $) | more than $160 million (2025 $) |
| <7% | 4.3% (49) | 54.4% (795) |
| =7% | 93.3% (1,064) | 45.1% (658) |
| >7% | 2.4% (28) | 0.5% (7) |
| Total | 100% (1,141 IPOs) | 100% (1,460 IPOs) |

See Hsuan-Chi Chen and Jay R. Ritter's "The Seven Percent Solution" in the June 2000 issue of the *Journal of Finance* for evidence from earlier years, available at

https://site.warrington.ufl.edu/ritter/files/2016/01/The-Seven-Percent-Solution-2000-06.pdf

and the updated graph at

https://site.warrington.ufl.edu/ritter/files/IPOs-gross-spreads.pdf

The proceeds level at which 7% is standard has also crept up: in 2001-2025, of the 239 IPOs with proceeds of $160-$200 million (in $2025, without including overallotment option shares), 86.1% had gross spreads of exactly 7.0%.

**Table 11** (December 30, 2025)

**Mean and Median Gross Spreads and Number of Managing Underwriters, 1980-2025**

IPOs with an offer price below $5.00 per share, unit offers, ADRs, closed-end funds, REITs, bank and S&L IPOs, energy limited partnerships, and firms not listed on CRSP within six months of the offer date are excluded. EW is equally weighted and PW is proceeds-weighted. The fraction=7% is the percentage of IPOs with a gross spread equal to exactly 7%. The number of managing underwriters is the sum of both leads and co-managers. The decrease in the fraction of IPOs with a 7% spread in 2001-2002 is due to the smaller fraction of deals with proceeds of less than $150 million. In 2008 (Visa with a spread of 2.8% on a $17.9 billion IPO), 2010 (General Motors with a spread of 0.75% on a $15.8 billion IPO), 2012 (Facebook with a 1.1% spread on a $16 billion IPO), and 2019 (Uber Technologies with a spread of 1.3% on an $8,.1 billion IPO), a higher fraction of IPOs were mega-deals with a gross spread far below 7%. The above proceeds numbers have not been adjusted for inflation. UW is Underwriter.

In the top panel, proceeds categories are expressed in dollars of January 2025 purchasing power, and overallotment shares are not included. The bottom panel (on the next page) reports year-by-year numbers.

**Mean and Median Gross Spreads by Proceeds Categories, 2001-2025**

| Proceeds ($2025) | Number of IPOs | Mean Gross spread | Median Gross spread | Mean First-day Returns |
|---|---|---|---|---|
| Less than $20 million | 137 | 7.50% | 7.00% | 22.4% |
| $20-49.99 million | 182 | 7.07% | 7.00% | 27.9% |
| $50-99.99 million | 477 | 6.98% | 7.00% | 9.5% |
| $100-199.99 million | 800 | 6.94% | 7.00% | 19.5% |
| $200-999.99 million | 1,037 | 6.42% | 6.74% | 21.5% |
| $1 billion or more | 191 | 4.44% | 4.75% | 17.9% |
| **2001-2025** | **2,824** | **6.62%** | **7.00%** | **19.1%** |

Note: For the smallest deals, it is not uncommon to have a “nonaccountable expense allowance” equal to up to 3% of the proceeds in addition to the gross spread. As a result, the underwriter compensation for these small deals in higher than the numbers reported here.

| Year | Number of IPOs | Gross Spreads | | | | Fraction with Multiple Bookrunners | Number of Managing UWs | |
|---|---|---|---|---|---|---|---|---|
| | | Mean EW | Mean PW | Median | =7% | | Mean | Median |

**Table 11a** (May 18, 2026)

**First-day and Long-run Returns on IPOs by Lead-left Underwriter, 2012-2024**

1,645 operating company IPOs from 2012-2024 are used, with returns calculated through the end of December 2025. IPOs are categorized by the underwriter listed in the top left of the managing underwriters on the first page of the IPO prospectus (S.E.C. Form 424). The 11 underwriters with the highest number of operating company IPOs are listed, with other underwriters grouped into two other categories. Others (regionals) include Wm. Blair, Piper-Jaffray, Raymond James, RBC Capital Markets, Wells Fargo and other underwriters not otherwise named below with an underwriter rank of 6.0 or higher on a 1-to-9 scale. Others (lower tier) include Aegis, Boustead, EF Hutton, Maxim Group and others with an underwriter rank of below 6.0. IPOs with an offer price below $5.00 per share, unit offers, ADRs, REITs, closed end funds, natural resource partnerships, banks and S&Ls, small best efforts offers, and IPOs not listed on CRSP within six months of the offer date are excluded. Buy-and-hold returns are calculated from the first closing market price (not from the offer price) until the earlier of the three-year anniversary or the delisting date. Market-adjusted returns use the Morningstar US Total Market Index. Style adjustments use firms matched by market cap and book-to-market ratio with at least five years of CRSP listing and no follow-on equity issues in the prior five years. Specifically, the firm with the closest book-to-market ratio within the size decile of the IPO is used for the matching firm. For companies with dual-class shares, the post-issue book-to-market ratio is calculated using the post-issue total shares outstanding for all share classes. Market capitalization (size) is calculated using the first closing market price after the IPO and the post-issue basic number of shares outstanding, a procedure that assumes that nontraded share classes would have the same price as traded shares, and that outstanding stock options have zero value. If a matching firm is delisted before the IPO, it is assumed that the proceeds of the delisted firm are then invested in the next-best matching firm at the time of the IPO. All returns include dividends and capital gains, including the index returns.

| Underwriter | Number of IPOs | Average First-day Return | Average 3-year Buy-and-hold Return | | |
|---|---|---|---|---|---|
| | | | IPOs | Market-adjusted | Style-adjusted |
| Goldman Sachs | 299 | 26.1% | 9.5% | -23.7% | -19.6% |
| JP Morgan | 248 | 24.7% | 18.5% | -13.3% | -3.0% |
| Morgan Stanley | 232 | 26.5% | 30.8% | -0.5% | 3.9% |
| BOA-Merrill | 140 | 23.8% | 18.6% | -16.1% | -1.1% |
| Jefferies | 99 | 23.8% | 0.6% | -33.1% | -25.7% |
| UBS/Credit-Suisse | 89 | 10.9% | 16.9% | -17.4% | -19.6% |
| Citigroup | 83 | 8.0% | 24.6% | -8.6% | -29.8% |
| Barclays | 53 | 15.4% | 30.0% | -0.4% | 8.0% |
| Cowen (now TD Bank) | 30 | 25.4% | -43.9% | -76.0% | -58.4% |
| Deutsche Bank | 19 | 11.7% | 44.4% | 12.7% | -1.8% |
| Stifel | 19 | 11.5% | 34.3% | 7.9% | 28.1% |

**Table 11b** (May 18, 2026)

**First-day and Long-run Returns on VC-backed IPOs by Lead-left Underwriter, 2012-2024**

988 venture capital-backed operating company IPOs from 2012-2024 are used, with returns calculated through the end of December 2025. IPOs are categorized by the underwriter listed in the top left of the managing underwriters on the first page of the IPO prospectus (S.E.C. Form 424). The 11 underwriters with the highest number of operating company IPOs (both VC-backed and other IPOs) are listed, with other underwriters grouped into two other categories. Others (regionals) include Wm. Blair, Piper-Jaffray, Raymond James, RBC Capital Markets, Wells Fargo and other underwriters not otherwise named below with an underwriter rank of 6.0 or higher on a 1-to-9 scale. Others (lower tier) include Aegis, Boustead, EF Hutton, Maxim Group and others with an underwriter rank of below 6.0. IPOs with an offer price below $5.00 per share, unit offers, ADRs, REITs, closed end funds, natural resource partnerships, banks and S&Ls, small best efforts offers, and IPOs not listed on CRSP within six months of the offer date are excluded. Buy-and-hold returns are calculated from the first closing market price (not from the offer price) until the earlier of the three-year anniversary or the delisting date. Market-adjusted returns use the Morningstar US Total Market Index. Style adjustments use firms matched by market cap and book-to-market ratio with at least five years of CRSP listing and no follow-on equity issues in the prior five years. Specifically, the firm with the closest book-to-market ratio within the size decile of the IPO is used for the matching firm. For companies with dual-class shares, the post-issue book-to-market ratio is calculated using the post-issue total shares outstanding for all share classes. Market capitalization (size) is calculated using the first closing market price after the IPO and the post-issue basic number of shares outstanding, a procedure that assumes that nontraded share classes would have the same price as traded shares, and that outstanding stock options have zero value. If a matching firm is delisted before the IPO, it is assumed that the proceeds of the delisted firm are then invested in the next-best matching firm at the time of the IPO. All returns include dividends and capital gains, including the index returns.

| Underwriter | Number of IPOs | Average First-day Return | Average 3-year Buy-and-hold Return | | |
|---|---|---|---|---|---|
| | | | IPOs | Market-adjusted | Style-adjusted |
| Goldman Sachs | 194 | 31.8% | 11.0% | -21.8% | -15.1% |

**Table 13** (updated August 1, 2025)

## IPOs Using Auctions and Limit Order Bookbuilding in the U.S., 1999-2025

The average first-day return on WRHambrecht's 19 IPO auctions has been 12.6%. For the 22 auction IPOs, including those by other underwriters, the average first-day return has been 12.5%. In 2020-2021, the five IPOs listed used bookbuilding although the issuer insisted that all indications of interest include both price and quantity indications. For IPO auctions for which WRHambrecht was the bookrunner, the numbers are as follows:

| Name of IPO (ticker) | Date of IPO | Gross Spread | Gross Proceeds | First-day Return |
|---|---|---|---|---|
| **1999: (3 out of 476 IPOs)** | | | | |
| Ravenswood Winery (RVWD) | 19990408 | 4.00% | $10.5 million | 3.62% |
| Salon.com (SALN) | 19990622 | 5.00% | $26.25 million | -4.76% |
| Andover.net (ANDN) | 19991208 | 6.50% | $72.0 million | 252.08% |
| **2000: (1 out of 380 IPOs)** | | | | |
| Nogatech (NGTC) | 20000518 | 6.50% | $42.0 million | -21.58% |
| **2001: (2 out of 79 IPOs)** | | | | |
| Peet's Coffee (PEET) | 20010125 | 6.50% | $26.4 million | 17.25% |
| Briazz (BRZZ) | 20010502 | 6.00% | $16.0 million | 0.38% |
| **2002: (1 out of 66 IPOs)** | | | | |
| Overstock.com (OSTK) | 20020529 | 4.00% | $39.0 million | 0.23% |
| **2003: (2 out of 63 IPOs)** | | | | |
| RedEnvelope (REDE) | 20030925 | 6.00% | $30.8 million | 3.93% |
| Genitope (GTOP) | 20031029 | 7.00% | $33.3 million | 11.11% |

In 2003, WRHambrecht was also the joint bookrunner with JP Morgan on the Sunset Financial Resources IPO that did not use an auction.

| | | | | |
|---|---|---|---|---|
| **2004: (1 out of 173 IPOs)** | | | | |
| New River Pharmaceuticals (NRPH) | 20040805 | 7.00% | $33.6 million | -6.25% |

In 2004, WRHambrecht was a co-manager on the Google auction IPO for which CSFB and Morgan Stanley were the bookrunners. The IPO climbed 18.04% on its first day of trading.

| | | | | |
|---|---|---|---|---|
| **2005: (5 out of 159 IPOs)** | | | | |
| B of I Holding (BOFI) | 20050315 | 6.00% | $35.1 million | 0.00% |
| Morningstar (MORN) | 20050502 | 2.00% | $140.83 million | 8.38% |
| CryoCor (CRYO) | 20050714 | 7.00% | $40.8 million | -1.18% |
| Avalon Pharmaceuticals (AVRX) | 20050928 | 7.00% | $28.8 million | -5.10% |
| Dover Saddlery (DOVR) | 20051117 | 5.00% | $27.5 million | 2.50% |
| **2006: (2 out of 157 IPOs)** | | | | |
| Traffic.com (TRFC) | 20060125 | 6.00% | $78.6 million | 1.25% |
| FortuNet (FNET) | 20060131 | 4.50% | $22.5 million | 0.56% |
| **2007: (2 out of 159 IPOs)** | | | | |
| Interactive Brokers Group (IBKR) | 20070504 | 1.88% | $1,200.4 million | 4.30% |
| Clean Energy Fuels (CLNE) | 20070525 | 5.85% | $120.0 million | 0.33% |

In 2007, WRHambrecht was a co-manager on the Netsuite auction IPO for which Credit Suisse was the bookrunner. The IPO climbed 36.54% on the first day of trading.

**2008: (0 out of 21 IPOs)**
In 2008, WRHambrecht was a co-manager on the Rackspace Hosting auction IPO for which Credit Suisse, Goldman Sachs, and Merrill Lynch were joint bookrunners. The IPO dropped 19.92% on its first day of trading.

**2009: (0 out of 41 IPOs)**
**2010: (0 out of 91 IPOs)**
**2011: (0 out of 81 IPOs)**
**2012: (0 out of 93 IPOs)**
**2013: (1 out 158 IPOs)**

| | | | | |
|---|---|---|---|---|
| Truett-Hurst Inc (THST) | 20130619 | 7.00% | $16.2 million | -5.33% |

**2014: (0 out of 206 IPOs)**
**2015: (0 out 118 IPOs)**
**2016: (0 out of 75 IPOs)**
**2017: (0 out of 106 IPOs)**
**2018: (0 out of 134 IPOs)**
**2019: (0 out of 113 IPOs)**

**The following 6 IPOs were not WR Hambrecht auction IPOs, but used a process known as limit order bookbuilding, requiring that indications of interest include a reservation price:**

**2020: (3 out of 165 IPOs)**

| | | | | |
|---|---|---|---|---|
| Unity Software (U) | 20200918 | 4.75% | $1,300.0 million | 31.4% |
| DoorDash (DASH) | 20201209 | 2.40% | $3,366.0 million | 85.8% |
| Airbnb (ABNB) | 20201210 | 2.12% | $3,490.0 million | 112.8% |

**2021: (2 out of 311 IPOs)**

| | | | | |
|---|---|---|---|---|
| ACV Auctions (ACVA) | 20210324 | 6.00% | $413.8 million | 25.0% |
| Marqeta (MQ) | 20210609 | 6.50% | $1,227.3 million | 13.0% |

**2022: (0 out of 38 IPOs)**
**2023: (0 out of 54 IPOs)**
**2024: (0 out of 72 IPOs)**

**2025:**

| | | | | |
|---|---|---|---|---|
| Figma (FIG) | 20250731 | 4.5% | $1,218.9 million | 250.0% |

Financial press articles stated that Unity required that all indications of interest submitted to the lead-left underwriter (Goldman Sachs) had to include a price as well as quantity of shares requested. Bids at multiple prices were permitted. All bids at or above the offer price received shares, but Unity reserved the right to make non-pro rata allocations among the winning bidders. DoorDash (Goldman Sachs), Airbnb (Morgan Stanley), ACV Auctions (Goldman Sachs), Marqeta (Goldman Sachs), and Figma (Morgan Stanley) used similar procedures. All raised the offer price substantially, but still left huge amounts of money on the table. These IPOs used bookbuilding, but indications of interest were required to have both price and quantity information. There may have been other IPOs that also used limit order bookbuilding.

WR Hambrecht has also been a bookrunner on several other IPOs that did not use an auction. For example, on 20150415, they did a $76 million best efforts IPO of Xbiotech (XBIT), which increased 22.37% on the first day of trading, on 20170630 they did a $12.0 million IPO for ShiftPixy, and on 20170921 they did a $19.1 million IPO for Arcimoto.

---

**Table 13a: Direct Listings in the U.S., 2018-2026**

(updated November 5, 2026)

With direct listings, no shares trade hands at the reference price. Instead, there is typically a large block trade at the open. The first-day return is thus calculated from the open to the closing price. With traditional IPOs, including auctions, the first-day return would be computed from the offer price to the close. The returns calculated in these two manners reflect the returns earned by buyers who bought from the issuer and selling shareholders. The July 2019 Nasdaq listing of iHeartMedia (IHRT) is not included because the stock was traded OTC beforehand. For Watford Holdings, the "Current Reference Price" is used instead of a "Reference Price" based on the front page of the SEC Form 424B3 prospectus. For this company, there had been no private market transactions on which to base a reference price. The current reference price was defined to be the market-clearing opening price. For Bright Green Corporation in May 2022, ZenaTech in October 2024, Damon in November 2024, Cloudastructure in January 2025, NeOnc in March of 2025, Turn Therapeutics and Nomadar in October 2025, Functional Brands and WeShop Holdings Ltd. in November 2025, and VenHub Global, Polaryx Therapeutics, TG-17, and others in 2026, the current reference price is also used. For Virtuix Holdings in January 2026, I am not positive whether there was a reference price of $8.75 or the opening price (current reference price) of $20.05 should be used. For Braiin, I am not sure whether $10.17 is the reference price or a $35.21 current reference price (the open) should be used.

Thryv Holdings has unusually low volume on the first day of trading, only 9,569 shares (this number has been confirmed with the company as correct). It had much higher volume on the second day, 208,916 shares, with a price jump to a close of $14.39. The prospectus for Thryv Holdings reports 30,829,145 shares outstanding, giving it a market cap at the opening price of $430 million, considerably less than the unicorns doing direct listings.

In 2022-2026, the companies doing direct listings have generally been microcap stocks.

## Table 13a

## Direct Listings in the U.S., 2018-2026

In the bottom panel, the last column is a measure of intraday volatility on the first day of trading. The average volatility for these five direct listings is about the same as that on the IPOs of similar companies. High, low, and closing prices, as well as trading volume, come from BigCharts, Marketwatch.com, Yahoo Finance, Seeking Alpha, or WSJ.com. Direct listings with first-day trading volume of below $40 million, computed using the closing market price, are listed in italics.

### Panel A: First day return from the open to close

| Name of Issuer (ticker) | Date of Listing | Prices | | | First-day Return |
|---|---|---|---|---|---|

**Table 13b** (updated February 26, 2026)

## Long-run Returns on Auction IPOs and Direct Listings

23 IPOs using auctions from 1999-2008, including one bank offering (B of I Holdings), are used, along with 12 direct listings from 2018-2021, with returns calculated through December 31, 2025. The companies are listed in Tables 13 (auctions) and 13a (direct listings). The five IPOs during 2020-2022 that used bookbuilding with limit orders, listed in Table 13 as auctions, are not included. There have also over 20 direct listings of small companies during 2022-2026, almost all of which displayed high first-day volatility. For the direct listings, the first-day return is computed from the opening price to the closing price, whereas for the auction IPOs, the offer price is used to calculate the first-day return. Buy-and-hold returns are calculated from the first closing market price until the earlier of the three-year or five-year anniversary or the delisting date, or December 31, 2025. Market-adjusted returns use the CRSP value-weighted index. Style adjustments use firms matched by market cap and book-to-market ratio with at least five years of CRSP listing and no follow-on equity issues in the prior five years. The market-adjusted and style-adjusted returns are the average buy-and-hold return on the IPOs minus the average compounded return on the benchmark. Market capitalization (size) is calculated using the first closing market price after the IPO and the post-issue number of shares outstanding.

### Panel A: 3-year Returns on Auction IPOs and Direct Listings from 1999-2021

| Sector | Number of IPOs | Average First-day Return | Average 3-year Buy-and-hold Return | | |
|---|---|---|---|---|---|
| | | | IPOs | Market-adjusted | Style-adjusted |
| Auction IPOs | 23 | 12.7% | 87.5% | 79.2% | 10.2% |
| Direct Listings | 12 | 2.1% | -3.6% | -36.4% | -40.7% |
| Other IPOs 1999-2021 | 3,404 | 30.2% | -3.4% | -17.5% | -23.0% |

6 of the 23 auction IPOs had 3-year buy-and-hold returns of at least 150%. The style-adjusted return for the auction IPOs is much lower than the market-adjusted return because two of the matching firms had 3-year buy-and-hold returns of over 700%.

### Panel B: 5-year Returns on Auction IPOs and Direct Listings from 1999-2021

| Sector | Number of IPOs | Average First-day Return | Average 5-year Buy-and-hold Return | | |
|---|---|---|---|---|---|
| | | | IPOs | Market-adjusted | Style-adjusted |
| Auction IPOs | 23 | 12.7% | 89.2% | 71.5% | 3.5% |
| Direct Listings | 12 | 2.1% | 131.9% | 65.6% | 101.4% |
| Other IPOs 1999-2021 | 3,404 | 30.2% | 11.8% | -20.3% | -29.2% |

**Table 14** (December 30, 2025)

**The Market Share of Foreign Companies among U.S. IPOs, 1980-2025**

This table includes American Depositary Receipts (ADRs) as well as other IPOs, and so has a higher total number of U.S. IPOs. I continue to exclude IPOs with an offer price below $5.00 per share, unit offers, SPACs, REITs, closed-end funds, natural resource limited partnerships, small best efforts IPOs, banks and S&Ls, and IPOs not listed on CRSP (this last screen limits the sample to NASDAQ, Amex, and NYSE-listed issues) within six months of the offer date. Bermuda-domiciled companies are included as foreign, irrespective of the main country of operations. Bermuda, Canada, China, Greece, Israel, the Netherlands, and the United Kingdom are the most common countries for IPOs that list in the U.S. Dealogic is the main source of information on foreign IPOs, because other databases frequently classify a follow-on offering that simultaneously includes a U.S. listing as an IPO, as does the NYSE. I have deleted these listings (a list of more than 110 of them can be found in "SDC Corrections" on my IPO Data page) from the IPO counts when I have been able to identify them. The count for Chinese IPOs does not include those from Hong Kong and excludes "reverse mergers" and best efforts IPOs. There are six bank IPOs of ADRs that are counted (1 in 1988, 1 in 1993, 2 in 1994, and 2 in 2009). There were 4 additional foreign issues in 1981, but they did not get listed on CRSP until more than six months after the IPO.

There ae 9 unit ADRs (2 in 1993, and 1 each in 1994, 1995, 1996, 1997, 2009, 2010, and 2023) that are included. For the column "Mean IR%" (Mean percentage initial return, measured from the offer price to the first-day close), market prices are missing for 11 of the 583 ADRs.

In addition to the IPOs listed in this table, there have been more than 80 Chinese IPOs with an offer price of below $5.00 per share, plus some unit offers. Some of these deals were best efforts offerings. Those with an offer price below $5 per share include the following (these deals raised a median of less than $10 million):

| | |
|---|---|
| 2007 | 2 |
| 2008 | 1 |
| 2009 | 2 |
| 2010 | 4 |
| 2015 | 1 |
| 2016 | 1 |
| 2017 | 2 + 2 best efforts offers |
| 2018 | 3 |
| 2019 | 4 |
| 2020 | 3 |
| 2021 | 6 |
| 2022 | 3 |
| 2023 | 9 |
| 2024 | 21 (including 1 ADR) + 22 from Hong Kong |
| 2025 | 22 + 30 from Hong Kong |

| Year | IPOs including ADRs | | Domestic | Foreign | | % Foreign | Chinese | | % Chinese |
|---|---|---|---|---|---|---|---|---|---|
| | Number | Mean IR % | | Total | ADRs | | Total | ADRs | |
| 1980 | 71 | 14.3% | 70 | 1 | 0 | 1.4% | 0 | 0 | 0% |

**Table 15** (updated July 27, 2026)

**How Many IPOs Are There?**

The net number of IPOs excludes Special Purpose Acquisition Companies (SPACs), closed-end funds, Real Estate Investment Trusts (REITs), unit offers (typically composed of a share plus a warrant to buy a share), IPOs with an offer price of less than $5.00, commercial banks and savings and loans S&Ls), companies not promptly listed on the Amex, NYSE, or Nasdaq, master limited partnerships (partnerships of natural resource companies, but not private equity firms such as Carlyle), small best efforts offers (included in the other exclusions column), and foreign companies issuing American Depositary Receipts (6 of which are banks). 11 ADRs are missing a first-day return, and the "including ADRs" averages exclude them. SPACs that are unit offers are classified as SPACs rather than units. No CRSP listing refers to IPOs not listed on CRSP within six months of the IPO. CRSP covers stocks listed on Nasdaq, the NYSE, and the NYSE MKT (the Amex prior to May 10, 2012).

Some IPOs are excluded for multiple reasons. For example, some bank and S&L IPOs are also excluded due to not being listed on CRSP. The bank and S&L count includes all of them (other than ADRs).

In 2024, there are 2 out of 10 ADRs that are also penny stocks (IPOs with an offer price of below $5). In 2025, 5 out of 8 ADRs were penny stocks.

**Table 15**

| Year | Number of IPOs | | CEFs, SPACs, and REITs | Units and penny stocks | LPs | Banks and S&Ls | No CRSP listing or others | ADRs |

**Table 15a** (updated July 27, 2026)
**IPO Volume and Average First-day Returns with Banks, LPs, and ADRs Included**

In the last two columns of the table, the net number of IPOs is expanded to include LPs, banks and S&Ls, and ADRs. Only CRSP-listed IPOs that have first-day return information are included, and therefore the number of IPOs added is slightly less for many years than if the "net" IPO count is added to the LP count, the bank and S&L count, and the ADR count. CRSP covers IPOs that are listed on Nasdaq, NYSE, and NYSE Market (formerly Amex). If a stock takes more than six months before CRSP-listing, it is not included in the count. The sample size of 16,541 IPOs from 1980-2025 includes the 9,253 operating company IPOs from 1980-2025 used in most tables, plus many penny stock IPOs and unit offers, 591 ADRs with a first-day return, 228 natural resource industry limited partnerships, and 645 bank and S&L IPOs (6 of which are ADRs). There are also 14 ADRs with a missing first-day close (1 in 1986, 2 in 1988, 2 in 1989, 2 in 1992, 2 in 1993, 3 in 1994, 1 in 1995, 1 in 1997). For 2024, the sum of ADRs, Banks, LPs, and the other 72 operating companies is reduced because of a bank best efforts offer and 2 penny stock ADRs. For 2025, of 109 penny stocks, 2 were also units and 5 were also ADRs.

As with Table 15, the net number of IPOs in the first column excludes Special Purpose Acquisition Companies (SPACs), closed-end funds (not including interval funds), Real Estate Investment Trusts (REITs), unit offers (typically composed of a share plus a warrant to buy a share), IPOs with an offer price of less than $5.00, commercial banks and savings and loans, companies not promptly listed on the Amex, NYSE, or Nasdaq, natural resource master limited partnerships, small best efforts offers (included in the other exclusions column), and foreign companies issuing American Depositary Receipts (6 of which are banks). SPACs that are unit offers are classified as SPACs rather than units.

Table 15a also differs from Table 15 in that the category of SPACs, closed-end funds, and REITs in Table 15 is decomposed into the three component parts. Blind pool offerings from the pre-2004 era were previously not included as SPACs, but I have recently added those from 1988-1997. These blind-pool offers are almost always screened out of the net number of offerings because they are either unit offers, penny stocks (offer price below $5 per share), small best efforts deals, or were not CRSP-listed. The remaining blind pool offers are excluded in the "other reasons" category. A typical blind pool offering raised a few million dollars and investors never received anything in return.

The average first-day return on 645 bank and S&L IPOs is 6.1%, with a range of -20% to +57.5%. In most of my tables, I exclude Bank and S&L IPOs because, among other reasons, it is not always clear how many shares are sold to the general public versus sold to depositors and employees, since most of these offerings are demutualizations. Many bank demutualizations use best efforts offerings, and in most years I exclude these 200+ IPOs. The same can be said of some insurance IPOs, which I include.

The average first-day return on 591 ADR IPOs with a closing market price, including banks but excluding 11 penny stocks, is 17.0%, with a range of -37.2% to 414.3%, with the 2000 internet company Crayfish Co. Ltd IPO having the highest return, at 414.3%. In most of my tables, I exclude ADRs because, among other reasons, the accounting data is not always reliable (SDC sometimes makes translation mistakes) and the U.S. tranche may be a small part of a larger offering, especially in the home country of the company.

The average first-day return on 228 limited partnerships is 3.7%, with a range of -6.8% to +33.3%. In most of my tables, I exclude natural resource company limited partnerships because it if frequently difficult to discern the founding date of the underlying business, since most of these IPOs are spinoffs partly motivated by tax minimization strategies. Also, most of these LPs are created at the time of the IPO, and identifying whether the LP is profitable, what its trailing sales are, and what its assets are, is sometimes problematic. The same can be said of rollups, which I include. I also include newly created reinsurance companies.

## Table 15a

| Year | Number of IPOs | | CEFs, SPACs, and REITs | Closed-end funds | REITs | SPACs | | LPs | Banks and S&Ls | Including LPs, Banks, & ADRs | |
|---|---|---|---|---|---|---|---|---|---|---|---|
| | Gross | Net | | | | Non-unit | Unit | | | No. | Mean IR |
| 1980 | 234 | 71 | 1 | 0 | 1 | 0 | 0 | 0 | 0 | 71 | 14.3% |
| 1981 | 439 | 192 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 192 | 5.9% |
| 1982 | 198 | 77 | 1 | 0 | 1 | 0 | 0 | 0 | 3 | 80 | 10.5% |

**Table 15b** (updated October 5, 2026)

## Special Purpose Acquisition Company (SPAC) IPOs, 1990-2026

IR is the initial return, measured from the offer price to the first close. Proceeds are in billions and do not include overallotment shares. For 1990-1997 and 2004-2007, 50 of the initial returns are missing for SPAC OTC issues. For SPACs from before 2010, data has been provided by Tim Jenkinson, Andrew Karolyi, and Milos Vulanovic. SPAC Research, Gritstone Asset Management, and Dealogic have been used as data sources for SPACs in 2015-2025. For 1990-2022, LSEG (SDC) misclassifies over 140 SPAC IPOs, usually as closed-end funds (SIC 6726).

| | Operating Company IPOs | | SPAC IPOs | | | SPAC IPOs | |
|---|---|---|---|---|---|---|---|
| Year | Number | Mean IR | Non-unit | Unit | Total | Proceeds, $b | Mean IR |

**Table 15c** (updated on October 5, 2026)

**Post-merger Returns on deSPACs, 2012-2025**

This table is an updated version of Table 4 in "SPACs" by Minmo Gahng, Jay R. Ritter, and Donghang Zhang, published in the Sept. 2023 *Review of Financial Studies*. The table reports average equally weighted deSPAC period common share percentage returns based on a buy-and-hold strategy (Equation (3)) in which an investor purchases common shares of a merged company at the close of the first day of trading as a new entity (the deSPAC) and holds them for 1 or 3 years. The year column represents the year of the merger. The sample consists of 625 business combinations consummated between January 2010 and December 2024, after excluding a few deSPACs that were listed OTC rather than on Nasdaq or the NYSE. When the full 1- or 3-year data are not available, we calculate the returns based on available data. For example, if a merged company started to trade in March 2020 and delisted in August 2020, we report the buy-and-hold returns from March 2020 to August 2020 for both one-year and three-year returns (not annualized). 1-year and 3-year returns end in December 2025. The market return uses the Morningstar US Total Market Index total return, matched to each investment period. The main source for deSPAC information is SPACResearch.com.

For 2023, the 3-year returns are for less than 3 years. In 2021, GNRS is not included because this deSPAC was traded OTC. (The returns are reported for 63 of the 64 deSPACs.) It should be noted that if there is a high redemption rate, the public float after the deSPAC can be quite low until shares that were locked up become available for trading. For 2025, returns are measured from an assumed $10 price to the Dec. 31 split-adjusted close.

The equally weighted average deSPAC return would be similar if a purchase price of $10 was used, since the average first closing deSPAC price is close to $10 in most years. The average deSPAC return would be higher, however, if a public cash-weighted return was reported, because it tends to be the case that deSPACs with high redemption rates (low public cash) have worse subsequent returns. Also, some deSPACs involve side payments to non-redeeming shareholders, for instance giving 0.5 sponsor shares to each non-redeeming shareholder. For these shareholders, the effective purchase price is thus approximately $6.67 rather than $10.00, so their returns would be higher if the deSPAC return accounted for the side payment. Guilherme Junqueira and Rui Guo assisted in the update of this table.

| | | Average 1-year Return | | | Average 3-year Buy-and-hold Return | | |
|---|---|---|---|---|---|---|---|
| Year | Number | deSPACs | Market | Mkt-adjusted | deSPACs | Market | Mkt-adjusted |
| 2012 | 1 | -53.2% | 20.4% | -73.6% | -98.1% | 37.2% | -135.3% |
| 2013 | 5 | -30.1% | 17.9% | -48.0% | -41.1% | 28.0% | -69.1% |
| 2014 | 4 | -51.6% | 5.7% | -57.3% | -89.6% | 26.7% | -116.2% |
| 2015 | 9 | -19.5% | 0.7% | -20.2% | 87.7% | 33.1% | 54.6% |

| 2012-2023 | 552 | -49.7% | 7.0% | -56.7% | -57.7% | 17.0% | -74.7% |
| 2012-2024 | 625 | -51.2% | 7.9% | -59.1% | | | |

**Table 16** (updated February 16, 2026)

**Long-run Returns on IPOs Categorized by the Pre-issue Sales of the Firm, 1980-2024**

All Last Twelve Months (LTM) sales figures for the firms going public have been converted into dollars of January 2024 purchasing power using the Consumer Price Index. 9,253 IPOs from 1980-2024 are used, with returns calculated through the end of December 2025. IPOs with an offer price below $5.00 per share, unit offers, ADRs, REITs, closed end funds, natural resource partnerships, banks and S&Ls, small best efforts offers, and IPOs not listed on CRSP within six months of the offer date are excluded. mm is millions of dollars. Buy-and-hold returns are calculated until the earlier of the three-year anniversary or the delisting date (no later than Dec. 31 of 2025 for IPOs from 2023 and 2024). Market-adjusted returns use the Morningstar U.S. Total Market Index. Style adjustments use firms matched by market cap and book-to-market ratio with at least five years of CRSP listing and no follow-on equity issues in the prior five years. Specifically, the firm with the closest book-to-market ratio within the size decile of the IPO is used for the matching firm. For post-issue book value of equity numbers, I use the post-issue common equity numbers from SDC with corrections by checking the prospectus, and for the remaining missing numbers I use the equity book values reported for the nearest quarter after the IPO on COMPUSTAT, and further missing numbers are calculated using the reported pre-IPO equity book values plus the amount of the proceeds (assuming that overallotment option shares and costs of issuing offset each other) times the fraction of the primary shares. For dual-class shares, the post-issue book-to-market ratio is calculated using the larger of the post-issue number of shares reported from SDC (with corrections to account for all share classes) and the total shares outstanding reported from CRSP at end of the IPO date. Market capitalization (size) is calculated using the first closing market price after the IPO and the post-issue number of shares outstanding. If a matching firm is delisted before the IPO, it is assumed that the proceeds of the delisted firm are then invested in the next-best matching firm at the time of the IPO. All returns include dividends and capital gains, including the index returns.

| Sales (in 2025$) | Number of IPOs | Average First-day Return | Average 3-year Buy-and-hold Return | | |
|---|---|---|---|---|---|
| | | | IPOs | Market-adjusted | Style-adjusted |
| 0-9.999 mm | 1,739 | 23.6% | -16.2% | -52.3% | -34.0% |
| 10-19.999 mm | 647 | 28.0% | 0.0% | -35.8% | -20.6% |
| 20-49.999 mm | 1,362 | 24.7% | 12.5% | -30.1% | -9.6% |
| 50-99.999 mm | 1,395 | 18.9% | 27.6% | -15.3% | -4.6% |
| 100-499.999 mm | 2,610 | 15.5% | 39.1% | -2.6% | 5.4% |
| 500 mm and up | 1,500 | 10.3% | 31.8% | -4.4% | -3.0% |
| 0-99.999 mm | 5,143 | 23.2% | 5.3% | -34.3% | -17.9% |
| 100 mm and up | 4,110 | 13.6% | 36.4% | -3.2% | 2.3% |
| **1980-2024** | 9,253 | 18.9% | 19.1% | -20.5% | -8.9% |

**Table 16a** (updated February 16, 2026)

**Long-run Returns on IPOs Categorized by the Pre-issue Sales of the Firm, 1980-2024**

The caption to Table 16 describes the return calculations in more detail. The average 3-year buy-and-hold returns are calculated starting at the closing market price on the first day of trading.

| Sales (in 2025$) | Number of IPOs | Average First-day Return | Average 3-year Buy-and-hold Return | | |
|---|---|---|---|---|---|
| | | | IPOs | Market-adjusted | Style-adjusted |
| Less than $1 billion | 8,387 | 19.9% | 17.8% | -22.4% | -9.9% |
| $1 billion and up | 866 | 9.8% | 32.4% | -2.1% | 0.6% |
| **1980-2024** | 9,253 | 18.9% | 19.1% | -20.5% | -8.9% |

Note: For example, a -20.5% 3-year market-adjusted buy-and-hold return for all IPOs corresponds to an annualized market-adjusted return of -5.5% per year, with an average holding period of 2.8 years, because 1.191/1.396=0.853 (which is the wealth relative, or public market equivalent), and $0.853^{0.357}$=0.945. The 39.6% buy-and-hold market return is 20.5% above the 19.1% average buy-and-hold return, and 0.357 is equal to 1/2.8. Alternatively stated, underperformance of 5.5% per year for 2.8 years results in a wealth relative of 0.853.

**Table 16b** (updated February 16, 2026)

**Long-run Returns on IPOs Categorized by the Profitability of the Firm, 1980-2024**

All Last Twelve Months (LTM) sales figures for the firms going public have been converted into dollars of January 2025 purchasing power using the Consumer Price Index. 9,253 IPOs (including the 2016 IPO of BATS Global Markets, which listed on BATS) from 1980-2024 are used, with returns calculated through December 31, 2024. IPOs with an offer price below $5.00 per share, unit offers, ADRs, REITs, closed end funds, natural resource partnerships, banks and S&Ls, small best efforts offers, and IPOs not listed on CRSP within six months of the offer date are excluded. Buy-and-hold returns are calculated from the first closing market price until the earlier of the three-year anniversary or the delisting date (Dec. 31 of 2025 for IPOs from 2023 and 2024). Market-adjusted returns use the Morningstar U.S. total market index. Style adjustments use firms matched by market cap and book-to-market ratio with at least five years of CRSP listing and no follow-on equity issues in the prior five years. The market-adjusted and style-adjusted returns are the average buy-and-hold return on the IPOs minus the average compounded return on the benchmark. For post-issue book value of equity numbers, I use the post-issue common equity numbers from SDC with corrections by checking the prospectus, and for the remaining missing numbers I use the equity book values reported for the nearest quarter after the IPO on COMPUSTAT, and further missing numbers are calculated using the reported pre-IPO equity book values plus the amount of the proceeds (assuming that overallotment option shares and costs of issuing offset each other) times the fraction of the primary shares. For dual-class shares, the post-issue book-to-market ratio is calculated using the larger of the post-issue number of shares reported from SDC (with corrections to account for all share classes) and the total shares outstanding reported from CRSP at end of the IPO date. Market capitalization (size) is calculated using the first closing market price after the IPO and the post-issue number of shares outstanding. Earnings per share (EPS) is for the pre-IPO last twelve months (LTM). All returns include dividends and capital gains, including the index returns.

| | | Average | Average 3-year Buy-and-hold Return | | |
|---|---|---|---|---|---|
| Trailing LTM EPS | Number of IPOs | First-day Return | IPOs | Market-adjusted | Style-adjusted |
| Unprofitable | 3,926 | 26.5% | -0.5% | -30.7% | -23.4% |
| Profitable | 5,327 | 13.3% | 33.6% | -13.0% | 1.8% |
| Sales less than $100 million ($2025) | | | | | |
| Unprofitable | 2,880 | 29.1% | -10.3% | -40.9% | -29.6% |

**Table 16e** (March 23, 2026)

**Distribution of 3-year and 5-year Buy-and-Hold Returns on IPOs, 1975-2021**

9,195 IPOs from 1975-2021 are used, with buy-and-hold returns calculated until the earlier of the 3-year or 5-year anniversary, the delisting date, or Dec. 31, 2025. All returns include dividends and capital gains. IPOs with an offer price below $5.00 per share, unit offers, ADRs, REITs, closed end funds, SPACs, natural resource partnerships, banks and S&Ls, small best efforts offers, and IPOs not listed on CRSP within six months of the offer date are excluded. The average first-day return in Panel A is 18.7%, with an average 3-year buy-and-hold return (BHR) of 21.2% (median of -25.7%), measured from the first close, and 38.5% (median of -16.6%), measured from the offer price. In Panel B, the average first-day return is 13.4%, with a subsequent average 3-year buy-and-hold return of 38.1% (median of 2.6%), measured from the first close, and 54.3% (median of 13.9%), measured from the offer price. Sales is inflation-adjusted sales for the last twelve months (LTM) prior to the IPO, in dollars of January 2025 purchasing power using the CPI.

Panel A: All 9,195 operating company IPOs from 1975-2021

| 3-year buy-and-hold return | From the first close | | From the offer price | |
|---|---|---|---|---|

**Table 16e** (continued)

The average first-day return in Panel C is 18.7%, with an average 5-year buy-and-hold return (BHR) of 37.8% (median of -32.0%), measured from the first close, and 57.2% (median of -22.1%), measured from the offer price. In Panel D, the average first-day return is 13.4%, with a subsequent average 5-year buy-and-hold return of 56.4% (median of -1.2%), measured from the first close, and 74.9% (median of 11.4%), measured from the offer price. Sales is inflation-adjusted sales for the last twelve months (LTM) prior to the IPO, in dollars of January 2025 purchasing power using the CPI. For the 2021 cohort, returns are calculated through Friday, Dec. 29, 2025 unless an IPO was delisted earlier. Columns may not add to 100% due to rounding.

Panel C: All 9,195 operating company IPOs from 1975-2021

| 5-year buy-and-hold return | From the first close | | From the offer price | |

**Table 16f** (updated February 16, 2026)

**Aftermarket Returns with and without Including the First-day Return**

9,253 operating company IPOs from 1980-2024 are used, with returns calculated through December 31, 2025. IPOs with an offer price below $5.00 per share, unit offers, SPACs, ADRs, REITs, closed end funds, natural resource partnerships, banks and S&Ls, small best efforts offers, and IPOs not listed on CRSP within six months of the offer date are excluded. Buy-and-hold returns are calculated from the first closing market price until the earlier of the three-year anniversary or the delisting date (Dec. 31 of 2025 for IPOs from 2023 and 2024). Market-adjusted returns use the Morningstar U.S. total market index. Style adjustments use firms matched by market cap and book-to-market ratio with at least five years of CRSP listing and no follow-on equity issues in the prior five years. The market-adjusted and style-adjusted returns are the average buy-and-hold return on the IPOs minus the average compounded return on the benchmark. Further details are reported in the captions to Tables 16a and 16b. Market capitalization (size) is calculated using the first closing market price after the IPO and the post-issue number of shares outstanding.

Tables 16c and 16d report similar numbers, but those tables exclude IPOs from the internet bubble years of 1999-2000.

**Panel A:**
**Long-run Returns Measured from the Offer Price on Tech and non-Tech IPOs, 1980-2024**

| Sector | Number of IPOs | Average First-day Return | Average 3-year Buy-and-hold Return | | |
|---|---|---|---|---|---|
| | | | IPOs | Market-adjusted | Style-adjusted |
| Tech | 3,334 | 31.2% | 50.1% | 15.6% | 27.9% |
| Non-Tech | 5,919 | 12.0% | 28.6% | -13.9% | -2.8% |
| All | 9,253 | 18.9% | 36.3% | -3.3% | 8.3% |

**Panel B:**
**Long-run Returns Measured from the First Close on Tech and non-Tech IPOs, 1980-2024**

| Sector | Number of IPOs | Average First-day Return | Average 3-year Buy-and-hold Return | | |
|---|---|---|---|---|---|
| | | | IPOs | Market-adjusted | Style-adjusted |
| Tech | 3,334 | 31.2% | 21.8% | -12.7% | -0.4% |
| Non-Tech | 5,919 | 12.0% | 17.6% | -24.9% | -13.7% |
| All | 9,253 | 18.9% | 19.1% | -20.5% | -8.9% |

**Table 17** (updated February 16, 2026)

**Long-run Returns on IPOs Categorized by VC-backing or Buyout Fund-backing**

All Last Twelve Months (LTM) sales figures for the firms going public have been converted into dollars of January 2025 purchasing power using the Consumer Price Index. IPOs from 1980-2024 are used, with returns calculated through the end of December 2025. In Panel A, the sample size is 9,253 firms. Growth capital-backed IPOs are included in the VC-backed category. IPOs with an offer price below $5.00 per share, unit offers, small best efforts offerings, ADRs, REITs, closed-end funds, natural resource limited partnerships, banks and S&Ls, and IPOs not listed on CRSP within six months of the offer date are excluded. In Panel B, one additional screen is implemented, reducing the sample size. This additional screen is that the last twelve months (LTM) sales of the issuing firm is at least $100 million (2024 purchasing power). Buy-and-hold returns are calculated from the first close until the earlier of the three-year anniversary or the delisting date (Dec. 31 of 2025 for IPOs from 2023 and 2024). Market-adjusted returns use the Morningstar U.S. total market index. Style adjustments use firms matched by market cap and book-to-market ratio with at least five years of CRSP listing and no follow-on equity issues in the prior five years. All returns include dividends and capital gains, including the index returns. Jerry Cao of the Hang Seng University of Hong Kong has assisted in providing data on the classification of IPOs as buyout-backed. Growth capital-backed IPOs are classified as VC-backed.

**Panel A: IPOs from 1980-2024 categorized by venture capital backing**

| VC-backed or not | Number of IPOs | Average First-day Return | Average 3-year Buy-and-hold Return | | |
|---|---|---|---|---|---|
| | | | IPOs | Market-adjusted | Style-adjusted |
| VC-backed | 3,733 | 27.0% | 21.6% | -13.6% | -3.2% |
| NonVC-backed | 5,520 | 13.5% | 17.5% | -25.2% | -12.8% |
| NonVC and nonBuyout | 4,270 | 14.6% | 14.0% | -32.2% | -16.3% |
| 1980-2024 | 9,253 | 18.9% | 19.1% | -20.5% | -8.9% |

Note: The nonVC- and nonBuyout-backed IPOs do not include a minimum sales screen, unlike in Panel B.

**Panel B: IPOs with at least $100 million in LTM sales (2025 purchasing power) from 1980-2024 categorized by private equity (buyout fund) backing**

| Buyout-backed or not | Number of IPOs | Average First-day Return | Average 3-year Buy-and-hold Return | | |
|---|---|---|---|---|---|
| | | | IPOs | Market-adjusted | Style-adjusted |
| Buyout-backed | 1,120 | 9.1% | 30.1% | -0.9% | 0.5% |
| NonBuyout-backed | 2,990 | 15.2% | 38.8% | -4.1% | 3.0% |
| All | 4,110 | 13.6% | 36.4% | -3.2% | 2.3% |

**Table 17a** (updated June 18, 2026)

**Long-run Returns on IPOs Categorized by VC-, Growth Capital-, or Buyout Fund-backing**

9,255 IPOs from 1980-2024 are used, with returns calculated through the end of December 2023. Buy-and-hold returns are calculated from the first closing price until the earlier of the three-year anniversary or the delisting date (Friday, Dec. 31 of 2025 for IPOs from 2023 and 2024). Market-adjusted returns use the Morningstar U.S. total market index. All returns include dividends and capital gains. Style adjustments use firms matched by market cap and book-to-market ratio with at least five years of CRSP listing and no follow-on equity issues in the prior five years. This table is an updated version of Table 3 of my "Growth Capital-backed IPOs" published in the 2015 *Financial Review*. Growth capital-backed IPOs are defined to be IPOs with a financial sponsor that is financing investments in tangible assets and/or acquisitions are a major part of its growth strategy. Buyouts involve the financial sponsor taking control by buying out prior shareholders. Corporate venture capital and angel investors are not included as financial sponsors.

| | Number of IPOs | Average First-day Return | Average 3-year Buy-and-hold Return | | |
|---|---|---|---|---|---|
| | | | IPOs | Market-adjusted | Style-adjusted |
| VC-backed | 3,268 | 28.8% | 18.5% | -15.4% | -4.5% |
| Growth capital-backed | 473 | 14.6% | 42.4% | -0.9% | 4.9% |
| Buyout-backed | 1,247 | 9.5% | 29.5% | -1.3% | -0.7% |
| Financial Sponsored | 4,988 | 22.6% | 23.5% | -10.5% | -2.7% |
| Non-Financial Sponsored | 4,267 | 14.6% | 14.0% | -32.2% | -16.2% |
| All | 9,255 | 18.9% | 19.1% | -20.5% | -8.9% |

Note: The high average 3-year buy-and-hold return for growth capital-backed IPOs is partly attributable, in a mechanical sense, to the six IPOs with the highest buy-and-hold returns in this subsample: The May 10, 1984 IPO of restaurant chain This Can't Be Yogurt (4,076.6%); the April 10, 1997 IPO of middleware software developer and distributor BEA Systems (2,562.2%); the November 15, 1989 IPO of original equipment manufacturer Solectron (944.0%); the April 24, 1996 IPO of outdoor advertising (billboards) operator Outdoor Systems (935.1%); the February 9, 1983 IPO of health care provider United States Health Care (636.6%); and the September 19, 1989 IPO of health care provider Vencor (635.8%).

**Table 18** (updated February 16, 2026)

**Long-run Returns on IPOs Categorized by VC-backing, by Subperiod**

The sample is composed of 9,253 IPOs from 1980-2024, with returns calculated through the end of December 2025. Growth capital-backed IPOs are classified as venture capital (VC)-backed in all panels. IPOs with an offer price below $5.00 per share, unit offers, small best efforts offerings, ADRs, REITs, closed end funds, SPACs, natural resource limited partnerships, banks and S&Ls, and IPOs not listed on CRSP within six months of the offer date are excluded. Buy-and-hold returns are calculated from the first closing market price until the earlier of the three-year anniversary or the delisting date (Dec. 31 of 2025 for IPOs from 2023 and 2024). Market-adjusted returns use the Morningstar U.S. total market index. All returns include dividends and capital gains. Style adjustments use firms matched by market cap and book-to-market ratio with at least five years of CRSP listing and no follow-on equity issues in the prior five years. Market capitalization (size) is calculated using the first closing market price after the IPO. All returns include dividends and capital gains, including the index returns.

**Panel A: IPOs from 1980-2024 categorized by venture capital backing**

| VC-backed or not | Number of IPOs | Average First-day Return | Average 3-year Buy-and-hold Return | | |
|---|---|---|---|---|---|
| | | | IPOs | Market-adjusted | Style-adjusted |
| VC-backed | 3,733 | 27.0% | 21.6% | -13.6% | -3.2% |
| NonVC-backed | 5,520 | 13.5% | 17.5% | -25.2% | -12.8% |
| All | 9,253 | 18.9% | 19.1% | -20.5% | -8.9% |

**Panel B: IPOs from 1980-1989**

| VC-backed or not | Number of IPOs | Average First-day Return | Average 3-year Buy-and-hold Return | | |
|---|---|---|---|---|---|
| | | | IPOs | Market-adjusted | Style-adjusted |
| VC-backed | 513 | 8.6% | 31.9% | -14.0% | 14.0% |
| NonVC-backed | 1,534 | 6.8% | 19.3% | -25.5% | -1.8% |
| All | 2,047 | 7.2% | 22.5% | -22.6% | 2.2% |

**Panel C: IPOs from 1990-1998**

| VC-backed or not | Number of IPOs | Average First-day Return | Average 3-year Buy-and-hold Return | | |
|---|---|---|---|---|---|
| | | | IPOs | Market-adjusted | Style-adjusted |
| VC-backed | 1,266 | 17.3% | 60.7% | -1.1% | 27.0% |
| NonVC-backed | 2,350 | 13.5% | 28.4% | -31.7% | -14.7% |
| All | 3,616 | 14.8% | 39.7% | -21.0% | -0.1% |

**Panel D: IPOs from 1999-2000**

| VC-backed or not | Number of IPOs | Average First-day Return | Average 3-year Buy-and-hold Return | | |
|---|---|---|---|---|---|
| | | | IPOs | Market-adjusted | Style-adjusted |
| VC-backed | 525 | 80.9% | -62.3% | -40.5% | -62.5% |
| NonVC-backed | 331 | 38.7% | -38.6% | -17.9% | -53.3% |
| All | 856 | 64.6% | -53.1% | -31.8% | -58.9% |

**Panel E: IPOs from 2001-2024**

| VC-backed or not | Number of IPOs | Average First-day Return | Average 3-year Buy-and-hold Return | | |
|---|---|---|---|---|---|
| | | | IPOs | Market-adjusted | Style-adjusted |
| VC-backed | 1,429 | 22.4% | 14.0% | -14.5% | -14.2% |
| NonVC-backed | 1,305 | 14.8% | 9.9% | -15.0% | -12.0% |
| All | 2,734 | 18.8% | 12.0% | -14.7% | -13.1% |

**Table 18a** (updated February 18, 2026)

**Long-run Returns on IPOs Categorized by VC-backing and Real Sales**

The sample is composed of 9,253 IPOs from 1980-2024, with returns calculated through the end of December 2025. IPOs with an offer price below $5.00 per share, unit offers, small best efforts offerings, ADRs, REITs, closed end funds, SPACs, natural resource limited partnerships, banks and S&Ls, and IPOs not listed on CRSP within six months of the offer date are excluded. Buy-and-hold returns are calculated from the first closing market price in Panels A and B, and from the offer price in Panels C and D, until the earlier of the three-year anniversary or the delisting date (Dec. 31 of 2025 for IPOs from 2023 and 2024. Market-adjusted returns use the Morningstar U.S. total market index. Style adjustments use firms matched by market cap and book-to-market ratio with at least five years of CRSP listing and no follow-on equity issues in the prior five years. Sales are the trailing twelve month revenues listed in the IPO prospectus, measured in terms of dollars of January 2025 purchasing power using the CPI. The highest 3-year buy-and-hold return from the offer price is that of Yahoo!, an April 12, 1996 VC-backed IPO with low trailing sales that jumped 153.8% on the first day and then went up another 3,589.8% during the next three years.

**Panel A: IPOs with Sales<$100 million from 1980-2024 categorized by VC-backing**

| | | Average | Average 3-year Buy-and-hold Return | | |
|---|---|---|---|---|---|
| VC-backed or not | Number of IPOs | First-day Return | IPOs | Market-adjusted | Style-adjusted |
| VC-backed | 2,655 | 28.5% | 10.3% | -23.5% | -10.0% |
| NonVC-backed | 2,488 | 17.5% | 0.1% | -45.8% | -26.3% |
| All | 5,143 | 23.2% | 5.3% | -34.3% | -17.9% |

**Panel B: IPOs with Sales>$100 million from 1980-2024 categorized by VC-backing**

| | | Average | Average 3-year Buy-and-hold Return | | |
|---|---|---|---|---|---|
| VC-backed or not | Number of IPOs | First-day Return | IPOs | Market-adjusted | Style-adjusted |
| VC-backed | 1,078 | 23.4% | 49.3% | 11.0% | 13.7% |
| NonVC-backed | 3,032 | 10.1% | 31.8% | -8.3% | -1.7% |
| All | 4,110 | 13.6% | 36.4% | -3.2% | 2.3% |

**Panel C: IPOs with Sales<$100 million, with returns measured from the offer price**

| | | Average | Average 3-year Buy-and-hold Return | | |
|---|---|---|---|---|---|
| VC-backed or not | Number of IPOs | First-day Return | IPOs | Market-adjusted | Style-adjusted |
| VC-backed | 2,655 | 28.5% | 32.7% | -1.2% | 12.4% |
| NonVC-backed | 2,488 | 17.5% | 12.8% | -33.0% | -13.5% |
| All | 5,143 | 23.2% | 23.0% | -16.6% | -0.2% |

**Panel D: IPOs with Sales>$100 million, with returns measured from the offer price**

| | | Average | Average 3-year Buy-and-hold Return | | |
|---|---|---|---|---|---|
| VC-backed or not | Number of IPOs | First-day Return | IPOs | Market-adjusted | Style-adjusted |
| VC-backed | 1,078 | 23.4% | 79.4% | 41.1% | 43.8% |
| NonVC-backed | 3,032 | 10.1% | 43.5% | 3.4% | 9.9% |
| All | 4,110 | 13.6% | 52.9% | 13.3% | 18.8% |

**Table 18b** (updated February 17, 2026)

**Long-run Returns on VC-backed and other IPOs Segmented by Industry, 1980-2024**

An earlier version of this table appears as Table 7 in "Going Public with IPOs and SPAC Mergers" by Rongbing Huang, Jay R. Ritter, and Donghang Zhang, forthcoming in *Research Handbook on the Structure of Private Equity and Venture Capital*. 9,253 IPOs from 1980-2024 are used, with returns calculated through December 31, 2025. IPOs with an offer price below $5.00 per share, unit offers, SPACs, ADRs, REITs, closed end funds, natural resource partnerships, banks and S&Ls, small best efforts offers, and IPOs not listed on CRSP within six months of the offer date are excluded. Buy-and-hold returns are calculated from the first closing market price until the earlier of the three-year anniversary or the delisting date (Dec. of 2025 for IPOs from 2023 and 2024). The captions to Tables 2 and 6 provide industry classification details. Market-adjusted returns use the Morningstar U.S. total market index. Style adjustments use firms matched by market cap and book-to-market ratio with at least five years of CRSP listing and no follow-on equity issues in the prior five years. The market-adjusted and style-adjusted returns are the average buy-and-hold return on the IPOs minus the average compounded return on the benchmark. Market capitalization (size) is calculated using the first closing market price after the IPO and the post-issue number of shares outstanding.

**Panel A: Long-run Returns on VC-backed IPOs, by Industry, 1980-2024**

| Sector | Number of IPOs | Average First-day Return | Average 3-year Buy-and-hold Return | | |
|---|---|---|---|---|---|
| | | | IPOs | Market-adjusted | Style-adjusted |
| Tech | 2,004 | 37.3% | 26.5% | -4.8% | 6.3% |
| Life science | 818 | 15.6% | 8.7% | -24.8% | -18.7% |
| Other | 911 | 14.5% | 22.2% | -22.7% | -10.1% |
| All | 3,733 | 27.0% | 21.6% | -13.6% | -3.2% |

**Panel B: Long-run Returns on nonVC-backed IPOs, by Industry, 1980-2024**

| Sector | Number of IPOs | Average First-day Return | Average 3-year Buy-and-hold Return | | |
|---|---|---|---|---|---|
| | | | IPOs | Market-adjusted | Style-adjusted |
| Tech | 1,330 | 22.0% | 14.6% | -24.6% | -10.6% |
| Life science | 202 | 17.2% | 33.7% | -2.8% | 22.3% |
| Other | 3,988 | 10.4% | 17.6% | -26.5% | -15.3% |
| All | 5,520 | 13.5% | 17.5% | -25.2% | -12.8% |

Note: The high life science 3-year buy-and-hold return, measured from the first close, for the 202 nonVC-backed IPOs in Panel B is partly driven by the 2,444.8% return on the June 1980 IPO of Enzo Biochem and the 1,606.1% return on the August 2003 IPO of New River Pharmaceutical, which used a WR Hambrecht + Co auction to go public. Of the 1,020 life science IPOs during 1980-2024, these are two of the three top long-run performers, with the VC-backed July 1998 IPO of Abgenix being the third, with a 2,071.1% return. Moderna, a December 2018 VC-backed IPO, produced the fifth-highest return.

**Table 18c** (updated February 17, 2026)

**Long-run Returns on VC-backed and other IPOs Segmented by Industry, 1999-2024**

An earlier version of this table appears as Table 8 in "Going Public with IPOs and SPAC Mergers" by Rongbing Huang, Jay R. Ritter, and Donghang Zhang, forthcoming in *Research Handbook on the Structure of Private Equity and Venture Capital*, edited by Brian Broughman and Elisabeth de Fontenay.

3,590 IPOs from 1999-2024 are used, with returns calculated through December 31, 2025. See the captions to Tables 2 and 6 in the book chapter above for a description of the sample and industry definitions.

**Panel A: Long-run Returns on VC-backed IPOs, by Industry, 1999-2024**

| Sector | Number of IPOs | Average First-day Return | Average 3-year Buy-and-hold Return | | |
|---|---|---|---|---|---|
| | | | IPOs | Market-adjusted | Style-adjusted |
| Tech | 1,042 | 54.3% | -13.0% | -19.6% | -26.6% |
| Life science | 609 | 18.3% | 2.0% | -23.8% | -24.2% |
| Other | 303 | 22.3% | -1.3% | -23.6% | -35.3% |
| All | 1,954 | 38.1% | -6.5% | -21.5% | -27.2% |

**Panel B: Long-run Returns on nonVC-backed IPOs, by Industry, 1999-2024**

| Sector | Number of IPOs | Average First-day Return | Average 3-year Buy-and-hold Return | | |
|---|---|---|---|---|---|
| | | | IPOs | Market-adjusted | Style-adjusted |
| Tech | 469 | 32.1% | -22.0% | -26.3% | -38.4% |
| Life science | 116 | 20.9% | 0.8% | -21.4% | -16.1% |
| Other | 1,051 | 14.0% | 9.9% | -10.1% | -12.7% |
| All | 1,636 | 19.7% | 0.1% | -15.5% | -20.3% |

**Table 18d** (April 7, 2026)

## Long-run Returns on IPOs Categorized by Price-to-Sales (PSR) Ratios

The sample is composed of 4,110 IPOs with inflation-adjusted ($2025) trailing twelve month sales of at least $100 million from 1980-2024, with returns calculated through the end of December 2025. IPOs with an offer price below $5.00 per share, unit offers, small best efforts offerings, ADRs, REITs, closed end funds, SPACs, natural resource limited partnerships, banks and S&Ls, and IPOs not listed on CRSP within six months of the offer date are excluded. Buy-and-hold returns are calculated from the first closing market price in Panel A, and from the offer price in Panel B, until the earlier of the three-year anniversary or the delisting date (Dec. 31 of 2025 for IPOs from 2023 and 2024). Market-adjusted returns use the Morningstar U.S. total market index. Style adjustments use firms matched by market cap and book-to-market ratio with at least five years of CRSP listing and no follow-on equity issues in the prior five years. Sales are the trailing twelve month revenues listed in the IPO prospectus, measured in terms of dollars of January 2025 purchasing power using the CPI. Price-to-sales ratios are calculated using the post-issue number of shares outstanding, using all share classes. For calculating the PSR, in Panel A the first closing market price is used, and in Panel B the offer price is used.

### Panel A: IPOs with Sales>$100 million, with returns measured from the first close

| Price-to-Sales Ratio | Number of IPOs | Average First-day Return | Average 3-year Buy-and-hold Return | | |
|---|---|---|---|---|---|
| | | | IPOs | Market-adjusted | Style-adjusted |
| PSR<5 | 3,384 | 8.9% | 41.3% | -1.3% | 6.2% |
| 5<PSR<10 | 395 | 24.1% | 20.7% | -8.0% | -15.9% |
| 10<PSR<20 | 198 | 36.6% | 18.5% | -7.7% | -3.2% |
| 20<PSR<40 | 87 | 55.9% | 2.9% | -16.3% | -12.4% |
| 40<PSR | 46 | 93.6% | -44.8% | -58.5% | -75.9% |
| All | 4,110 | 13.6% | 36.4% | -3.2% | 2.3% |

### Panel B: IPOs with Sales>$100 million, with returns measured from the offer price

| Price-to-Sales Ratio | Number of IPOs | Average First-day Return | Average 3-year Buy-and-hold Return | | |
|---|---|---|---|---|---|
| | | | IPOs | Market-adjusted | Style-adjusted |
| PSR<5 | 3,501 | 10.2% | 54.2% | 12.0% | 18.9% |
| 5<PSR<10 | 377 | 26.8% | 58.0% | 30.7% | 27.4% |
| 10<PSR<20 | 159 | 42.7% | 26.3% | 6.1% | 10.6% |
| 20<PSR<40 | 59 | 50.2% | 27.4% | 4.1% | -8.7% |
| 40<PSR | 14 | 35.4% | 3.1% | -15.4% | -10.0% |
| All | 4,110 | 13.6% | 52.9% | 13.3% | 18.8% |

Of the 14 IPOs with sales>$100 million and a price-to-sales ratio at the offer price of more than 40, 12 of the 14 subsequently underperformed the market if bought at the first close during their first three years, with the exceptions being the 2014 IPO of Mobileeye NV and the 2024 IPO of Astera Labs. The 2021 IPO of Nu Holdings outperformed if bought at the offer price.

**Table 18e** (April 8, 2026)

## Long-run Returns on IPOs Categorized by the Public Float

The sample is composed of 4,110 IPOs with inflation-adjusted ($2025) trailing twelve month sales of at least $100 million from 1980-2024, with returns calculated through the end of December 2025. IPOs with an offer price below $5.00 per share, unit offers, small best efforts offerings, ADRs, REITs, closed end funds, SPACs, natural resource limited partnerships, banks and S&Ls, and IPOs not listed on CRSP within six months of the offer date are excluded. Buy-and-hold returns are calculated from the first closing market price in Panel A, and from the offer price in Panel B, until the earlier of the three-year anniversary or the delisting date (Dec. 31 of 2025 for IPOs from 2023 and 2024). Market-adjusted returns use the Morningstar U.S. total market index. Style adjustments use firms matched by market cap and book-to-market ratio with at least five years of CRSP listing and no follow-on equity issues in the prior five years. Sales are the trailing twelve month revenues listed in the IPO prospectus, measured in terms of dollars of January 2025 purchasing power using the CPI. Float percentages are calculated using the post-issue number of shares outstanding, using all share classes, but with the numerator not including overallotment option shares. If overallotment shares are included, many IPOs with a measured float of 9.9% actually would be closer to 11.4%.

### Panel A: IPOs with Sales>$100 million, with returns measured from the first close

| Float | Number of IPOs | Average First-day Return | Average 3-year Buy-and-hold Return | | |
|---|---|---|---|---|---|
| | | | IPOs | Market-adjusted | Style-adjusted |
| Float ≤ 10% | 186 | 32.4% | 23.7% | -5.3% | 0.1% |
| 10%< Float ≤20% | 1,098 | 20.3% | 35.5% | 0.1% | 5.5% |
| 20%< Float ≤30% | 1,207 | 11.7% | 42.3% | 0.1% | 5.8% |
| 30%< Float ≤40% | 841 | 8.9% | 39.1% | -3.3% | 3.8% |
| 40% < Float | 778 | 7.6% | 28.8% | -12.6% | -8.6% |
| All | 4,110 | 13.6% | 36.4% | -3.2% | 2.3% |

### Panel B: IPOs with Sales>$100 million, with returns measured from the offer price

| Float | Number of IPOs | Average First-day Return | Average 3-year Buy-and-hold Return | | |
|---|---|---|---|---|---|
| | | | IPOs | Market-adjusted | Style-adjusted |
| Float ≤ 10% | 186 | 32.4% | 53.6% | 24.6% | 30.0% |
| 10%< Float ≤20% | 1,098 | 20.3% | 59.8% | 21.4% | 29.8% |
| 20%< Float ≤30% | 1,207 | 11.7% | 58.2% | 16.1% | 21.7% |
| 30%< Float ≤40% | 841 | 8.9% | 50.5% | 8.1% | 15.2% |
| 40% < Float | 778 | 7.6% | 37.4% | -3.9% | 0.1% |
| All | 4,110 | 13.6% | 52.9% | 13.3% | 18.8% |

**Table 19: Updated Table I of Ritter and Welch 2002 *Journal of Finance* article**

**Number of IPOs, First-day Returns, and Long Run Performance, IPOs from 1980-2024**
(Updated February 16, 2026)

The equally weighted (EW) average first-day return is measured from the offer price to the first CRSP-listed closing price. EW average three-year buy-and-hold percentage returns (capital gains plus dividends) are calculated from the first closing market price to the earlier of the three-year anniversary price, the delisting price, or December 31, 2025 (a Friday). Buy-and-hold returns for initial public offerings (IPOs) occurring after Dec. 31, 2024 are not calculated. Market-adjusted returns are calculated as the buy-and-hold return on an IPO minus the compounded daily return on the Morningstar U.S. total market index of Amex, Nasdaq, and NYSE firms. Style-adjusted buy-and-hold returns are calculated as the difference between the return on an IPO and a style-matched firm. For each IPO, a non-IPO matching firm that has been CRSP-listed for at least five years with the closest market capitalization (size) and book-to-market ratio as the IPO is used. Market capitalization is calculated using the first closing market price after the IPO. If this stock is delisted prior to the IPO return's ending date, or if it conducts a follow-on stock offering, a replacement matching firm is spliced in on a point-forward basis. IPOs with an offer price below $5.00 per share, unit offers, small best efforts offers, natural resource limited partnerships, REITs, closed-end funds, banks and S&Ls, ADRs, and IPOs not listed on CRSP within six months of issuing have been excluded. Data is from Thomson Financial Securities Data, with supplements from Dealogic and other sources, and corrections by the authors. The number of IPOs per year is much lower for the early 1980s than in the 1995 *Journal of Finance* article "The New Issues Puzzle" by Loughran and Ritter because that paper used a $1.00 offer price screen. The number is larger than in the 2002 *Journal of Finance* article "A Review of IPO Activity, Pricing, and Allocations" due to various data corrections and the back-filling of Nasdaq-listed foreign issuers by CRSP.

| Year | Number of IPOs | Average First-day Return | Average One-year Return | Average 3-year Buy-and-hold Return | | |
|---|---|---|---|---|---|---|
| | | | | IPOs | Market-adjusted | Style-adjusted |
| 1980 | 71 | 14.3% | 28.7% | 89.8% | 37.0% | 18.5% |
| 1981 | 192 | 5.9% | -10.5% | 12.3% | -27.0% | 11.0% |
| 1982 | 77 | 11.0% | 101.8% | 37.5% | -31.5% | -12.0% |
| 1983 | 451 | 9.9% | -19.2% | 15.9% | -37.7% | -4.4% |
| 1984 | 171 | 3.7% | 20.0% | 50.2% | -28.5% | 29.0% |
| 1985 | 186 | 6.4% | 23.6% | 5.6% | -41.3% | -12.3% |
| 1986 | 393 | 6.2% | 9.5% | 16.9% | -22.6% | -1.3% |
| 1987 | 285 | 5.6% | -21.5% | -2.6% | -19.1% | -11.2% |
| 1988 | 105 | 5.5% | 28.7% | 58.0% | 9.7% | 38.7% |
| 1989 | 116 | 8.0% | -5.5% | 48.1% | 13.2% | 7.2% |
| 1990 | 110 | 10.8% | 4.0% | 9.7% | -35.9% | -38.4% |
| 1991 | 286 | 11.9% | 10.5% | 31.2% | -1.8% | 5.8% |
| 1992 | 412 | 10.3% | 20.5% | 37.4% | -0.2% | 11.1% |
| 1993 | 510 | 12.7% | 3.0% | 44.1% | -8.7% | -9.5% |
| 1994 | 402 | 9.6% | 27.8% | 78.0% | -5.7% | -0.9% |
| 1995 | 462 | 21.4% | 26.5% | 28.6% | -58.0% | -24.7% |
| 1996 | 677 | 17.2% | 7.1% | 25.2% | -56.8% | 7.0% |
| 1997 | 474 | 14.0% | 8.0% | 58.3% | -2.0% | 22.0% |
| 1998 | 283 | 21.8% | 18.4% | 22.9% | 5.1% | -4.9% |
| 1999 | 476 | 71.2% | 22.1% | -47.6% | -32.5% | -60.6% |
| 2000 | 380 | 56.4% | -52.9% | -60.1% | -30.9% | -56.9% |

**Table 19a** (updated February 16, 2026)

**Long-run Returns on IPOs Categorized by Sales, by Subperiod**

The sample is composed of 9,253 IPOs from 1980-2024, with returns calculated through the end of December 2025. Sales are the trailing twelve months reported in the IPO prospectus, converted to dollars of January $2025 purchasing power using the CPI. IPOs with an offer price below $5.00 per share, unit offers, small best efforts offerings, ADRs, REITs, closed end funds, SPACs, natural resource limited partnerships, banks and S&Ls, and IPOs not listed on CRSP within six months of the offer date are excluded. Buy-and-hold returns are calculated from the first closing market price until the earlier of the three-year anniversary or the delisting date (Dec. 31 of 2025 for IPOs from 2023 and 2024). Market-adjusted returns use the Morningstar U.S. total market index. Style adjustments use firms matched by market cap and book-to-market ratio with at least five years of CRSP listing and no follow-on equity issues in the prior five years. Market capitalization (size) is calculated using the first closing market price after the IPO. All returns include dividends and capital gains, including the index returns.

**Panel A: IPOs from 1980-2000 categorized by annual sales ($2025)**

| Small or large sales? | Number of IPOs | Average First-day Return | Average 3-year Buy-and-hold Return | | |
|---|---|---|---|---|---|
| | | | IPOs | Market-adjusted | Style-adjusted |
| $100 million or less | 3,937 | 23.9% | 9.2% | -34.1% | -14.2% |
| Greater than $100 mm | 2,582 | 11.4% | 41.8% | -5.9% | 3.6% |
| All | 6,519 | 19.0% | 22.1% | -22.9% | -7.1% |

**Panel B: IPOs from 2001-2024 categorized by annual sales ($2025)**

| Small or large sales? | Number of IPOs | Average First-day Return | Average 3-year Buy-and-hold Return | | |
|---|---|---|---|---|---|
| | | | IPOs | Market-adjusted | Style-adjusted |
| $100 million or less | 1,206 | 20.6% | -7.3% | -34.9% | -29.9% |
| Greater than $100 mm | 1,528 | 17.3% | 27.3% | 1.2% | 0.1% |
| All | 2,734 | 18.8% | 12.0% | -14.7% | -13.1% |

**Table 19b** (February 18, 2026)

**Long-run Returns on IPOs Categorized by Whether the Midpoint of the Original File Price Range Was Less than $8 or Not, including Penny Stocks, IPOs from 2001-2024**

The sample is composed of 2,913 IPOs from 2001-2024, with returns calculated through the end of December 2025. IPOs with an offer price below $5.00 per share are included. Unit offers, small best efforts offerings, ADRs, REITs, closed end funds, SPACs, natural resource limited partnerships, banks and S&Ls, and IPOs not listed on CRSP within six months of the offer date are excluded. Buy-and-hold returns are calculated from the first closing market price until the earlier of the three-year anniversary or the delisting date (Dec. 31 of 2025 for IPOs from 2023 and 2024). Market-adjusted returns use the Morningstar U.S. total market index. All returns include dividends and capital gains. Style adjustments use firms matched by market cap and book-to-market ratio with at least five years of CRSP listing and no follow-on equity issues in the prior five years. Market capitalization (size) is calculated using the first closing market price after the IPO. All returns include dividends and capital gains, including the index returns.

Of the 331 IPOs with a file price range of below $8, 179 had an offer price below $5. These 179 IPOs had average first-day returns that are even higher, and 3-year buy-and-hold returns that are even worse, than those IPOs priced at $5 or $6.

Penny stock IPOs were rare in 2001-2020, but there have been many in 2021-2024 (and 2025), as shown in Table 15.

**Panel A: IPOs from 2001-2024 categorized by file price range midpoint**

| File price range midpoint | Number of IPOs | Average First-day Return | Average 3-year Buy-and-hold Return | | |
|---|---|---|---|---|---|
| | | | IPOs | Market-adjusted | Style-adjusted |
| Less than $8.00 | 331 | 53.7% | -52.4% | -86.4% | -62.7% |
| $8.00 or more | 2,582 | 17.7% | 16.2% | -10.3% | -9.6% |
| All | 2,913 | 21.7% | 8.4% | -18.9% | -15.6% |

**Panel B: Low file price midpoint IPOs from 2001-2024 categorized by profitability**

| Profitable or not? | Number of IPOs | Average First-day Return | Average 3-year Buy-and-hold Return | | |
|---|---|---|---|---|---|
| | | | IPOs | Market-adjusted | Style-adjusted |
| Last 12 months EPS<0 | 182 | 39.0% | -35.0% | -69.9% | -42.8% |
| Last 12 months EPS>0 | 149 | 71.6% | -73.6% | -106.6% | -87.0% |
| All | 331 | 53.7% | -52.4% | -86.4% | -62.7% |

**Table 19c** (February 18, 2026)

**Long-run Returns on IPOs Categorized by Whether the Offer Price Was Less than $5, Exactly $5, or Above $5, IPOs from 2001-2024**

The sample is composed of 2,913 IPOs from 2001-2024, with returns calculated through the end of December 2025. IPOs with an offer price below $5.00 per share are included. Unit offers, small best efforts offerings, ADRs, REITs, closed end funds, SPACs, natural resource limited partnerships, banks and S&Ls, and IPOs not listed on CRSP within six months of the offer date are excluded. Buy-and-hold returns are calculated from the first closing market price (in Panel A) and from the offer price (in Panel B) until the earlier of the three-year anniversary or the delisting date (Dec. 31 of 2025 for IPOs from 2023 and 2024). Market-adjusted returns use the Morningstar U.S. total market index. All returns include dividends and capital gains. Style adjustments use firms matched by market cap and book-to-market ratio with at least five years of CRSP listing and no follow-on equity issues in the prior five years. Market capitalization (size) is calculated using the first closing market price after the IPO. All returns include dividends and capital gains, including the index returns. There have been 179 IPOs with an offer price below $5, and 101 with an offer price of exactly $5. Penny stock IPOs were rare in 2001-2020, but there have been many in 2021-2024 (and 2025), as shown in Table 15.

**Panel A: IPO Returns from 2001-2024 categorized by the offer price (from 1st close)**

| | | Average | Average 3-year Buy-and-hold Return | | |
|---|---|---|---|---|---|
| Offer Price | Number of IPOs | First-day Return | IPOs | Market-adjusted | Style-adjusted |
| Less than $5.00 | 179 | 67.1% | -46.3% | -82.6% | -53.7% |
| $5.00 | 101 | 29.5% | -56.8% | -91.3% | -69.9% |
| More than $5.00 | 2,633 | 18.4% | 14.7% | -11.8% | -11.0% |
| All | 2,913 | 21.7% | 8.4% | -18.9% | -15.6% |

**Panel B: Penny Stock IPO Average 3-year Returns from 2001-2024 from the Offer Price**

| | | | | | |
|---|---|---|---|---|---|
| Less than $5.00 | 179 | 67.1% | -44.6% | -80.9% | -52.0% |

**Panel C: IPO Median Sales, Age, and Price-to-Sales Ratio, Valued at the 1st Close**

| | | Median | | Median Price-to-Sales Ratio | |
|---|---|---|---|---|---|
| Offer Price | Number of IPOs | Sales ($2025) | Median Age | Using Offer Price | Using First Close |
| Less than $5.00 | 179 | 10.5 | 7 | 7.6 | 8.5 |
| $5.00 | 101 | 4.4 | 7 | 15.3 | 20.6 |
| More than $5.00 | 2,633 | 148.9 | 11 | 5.9 | 6.8 |
| All | 2,913 | 116.8 | 10 | 6.1 | 7.1 |

**Table 19d** (February 19, 2026)

**Characteristics of IPOs from 2024-2025 Categorized by Whether the Midpoint of the Offer Price Was Less than $5, Exactly $5, or Above $5**

The sample is composed of 339 operating company IPOs from 2024-2025. Unit offers, small best efforts offerings, ADRs, REITs, closed end funds, SPACs, natural resource limited partnerships, banks and S&Ls, and IPOs not listed on CRSP within six months of the offer date are excluded. Trailing twelve month sales are in dollars of January 2025 purchasing power. Price-to-sales ratios use the post-issue number of shares outstanding and trailing sales. Proceeds are in millions and do not include overallotment shares. There have been 177 IPOs with an offer price below $5, 19 with an offer price of exactly $5, and 143 with an offer price above $5.00.

**Panel A: Percentage of profitable companies (trailing twelve months)**

| Offer Price | Number of IPOs | Percentage profitable | Percentage foreign | Mean proceeds, $m | Mean 1st day return, % |
|---|---|---|---|---|---|
| Less than $5.00 | 177 | 65% | 85% | $8.2 m | 8.6% |
| $5.00 | 19 | 79% | 79% | $9.6 m | 22.0% |
| More than $5.00 | 143 | 37% | 17% | $414.5 m | 23.3% |
| All | 339 | 54% | 56% | $179.7m | 15.5% |

**Panel B: IPO Median Sales, Age, and Price-to-Sales Ratio, valued at the first close**

| | | | | Median Price-to-Sales Ratio | |
|---|---|---|---|---|---|
| Offer Price | Number of IPOs | Median Sales ($2025) | Median Age | Using Offer Price | Using First Close |
| Less than $5.00 | 177 | 8.9 | 9 | 8.7 | 9.0 |
| $5.00 | 19 | 29.9 | 12 | 8.9 | 11.5 |
| More than $5.00 | 143 | 184.8 | 12 | 7.1 | 8.1 |
| All | 339 | 17.9 | 10 | 8.5 | 8.8 |

**Panel C: Categorized by Listing Exchange**

| | | Mean | Listing Exchange | | |
|---|---|---|---|---|---|
| Offer Price | Number of IPOs | 1st-day Return | Nasdaq | NYSE Amer | NYSE |
| Less than $5.00 | 177 | 8.6% | 155 | 22 | 0 |
| $5.00 | 19 | 22.0% | 16 | 3 | 0 |
| More than $5.00 | 143 | 23.3% | 81 | 8 | 54 |
| All | 339 | 15.5% | 252 | 33 | 54 |

## Table 19e (February 17, 2026)

## Long-run Returns on IPOs from 2001-2024 Categorized by the First-day Return

The sample is composed of 2,734 operating company IPOs from 2001-2024. Penny stocks (offer price below $5 per share), unit offers, small best efforts offerings, ADRs, REITs, closed end funds, SPACs, natural resource limited partnerships, banks and S&Ls, and IPOs not listed on CRSP within six months of the offer date are excluded. Buy-and-hold returns are calculated from the first closing market price until the earlier of the three-year anniversary or the delisting date (Dec. 31 of 2025 for IPOs from 2023 and 2024). Market-adjusted returns use the Morningstar U.S. total market index. All returns include dividends and capital gains. Style adjustments use firms matched by market cap and book-to-market ratio with at least five years of CRSP listing and no follow-on equity issues in the prior five years. Market capitalization (size) is calculated using the first closing market price after the IPO. All returns include dividends and capital gains, including the index returns.

Before 2001, zero first-day returns were more common, and negative returns less common, due to wider bid-ask spreads before stock prices started to be quoted in pennies. The relation between first-day returns and subsequent buy-and-hold returns before 2001 was not as strong as since then.

Although the table shows that companies that drop on the first day of trading subsequently underperform over the next three years, there are exceptions. For example, Academy Sports & Outdoors went public on October 2, 2020 at $13.00 per share and closed down a penny at $12.99. Over the next three years, the stock had a 256.2% return, substantially beating the market. 442 out of 654 (67.6%) “broken” IPOs had negative 3-year buy-and-hold returns, however.

| | | | Average 3-year Buy-and-hold Return | | |
|---|---|---|---|---|---|
| First-day return | Number of IPOs | Average First-day Return | IPOs | Market-adjusted | Style-adjusted |
| Negative | 654 | -8.9% | -3.8% | -32.0% | -23.2% |
| Exactly zero | 153 | 0.0% | 10.4% | -15.8% | -3.8% |
| Positive | 1,927 | 29.6% | 17.5% | -8.5% | -10.3% |
| All | 2,734 | 18.8% | 12.0% | -14.7% | -13.1% |

**Table 20** (updated July 7, 2026)

## Returns on IPOs during the five years after issuing, for IPOs from 1980-2024

These tables show that IPOs have underperformed other firms of the same size (market cap) by an average of 3.6% per year during the five years after issuing, not including the first-day return. The underperformance relative to other firms of the same size and book-to-market ratio has averaged 2.1% per year on an equally weighted basis. Returns are through Dec. 31, 2025.

**Table 20-1**
**Percentage returns on IPOs from 1980-2024 during the first five years after issuing**

| | First six months | Second six months | First Year | Second year | Third year | Fourth year | Fifth Year | Geometric Mean years 1-5 |
|---|---|---|---|---|---|---|---|---|
| IPO firms | 4.9% | -0.0% | 5.6% | 5.8% | 11.8% | 20.5% | 10.0% | 10.6% |
| Size-matched | 5.5% | 5.5% | 11.4% | 13.7% | 15.6% | 16.3% | 12.5% | 13.9% |
| Difference | -0.6% | -5.5% | -5.8% | -7.9% | -3.8% | 4.2% | -2.5% | -3.3% |
| IPO firms | 4.9% | -0.0% | 5.6% | 5.8% | 11.8% | 20.5% | 10.0% | 10.6% |
| Size & BM-Matched | 4.3% | 4.0% | 8.4% | 12.6% | 12.6% | 16.8% | 12.4% | 12.5% |
| Difference | 0.6% | -4.0% | -2.8% | -6.8% | -0.8% | 3.7% | -2.4% | -1.9% |
| No. of IPOs | 9,254 | 9,231 | 9,254 | 9,030 | 8,278 | 7,359 | 6,325 | |

All returns are equally weighted average returns for all IPOs that are traded on Nasdaq, the Amex (now NYSE MKT), or the NYSE at the start of a period. For the first and third columns, the returns are measured from the closing market price on the first day of CRSP-reported trading until the sixth-month or one-year anniversary. For years 2-5, each year the portfolios are rebalanced to equal weights. If an issuing firm is delisted within a year, its return for that year is calculated by compounding the Morningstar U.S. total market index for the rest of the year. For the size-matched returns, each IPO is matched with the nonissuing firm having the same or next higher market capitalization (using the closing market price on the first day of trading for the IPO, and the market capitalization at the end of the previous month for the matching firms). For the size & BM-matched returns, each IPO with a book-to-market ratio higher than zero is matched with a nonissuing firm in the same size decile (using NYSE firms only for determining the decile breakpoints) having the closest book-to-market ratio. Each IPO with a zero or smaller book-to-market ratio is matched with a nonissuing firm of a book-to-market ratio of zero or smaller having the closest market capitalization. For the IPOs, book-to-market ratios are calculated using the first recorded post-issue book value and the post-issue market cap calculated using the closing market price on the first CRSP-listed day of trading. For nonissuing firms, the Compustat-listed book value of equity for the most recent fiscal year ending at least four months prior to the IPO date is used, along with the market cap at the close of trading at month-end prior to the month of the IPO with which it is matched. Nonissuing firms are those that have been listed on the Amex-Nasdaq-NYSE for at least five years, without issuing equity for cash during that time. If a nonissuer subsequently issues equity, it is still used as the matching firm. If a nonissuer gets delisted prior to the delisting (or the fifth anniversary), the second-closest matching firm on the original IPO date is substituted, on a point-forward basis. For firms with multiple classes of stock outstanding, market cap is calculated using the offer price and the total number of shares outstanding across all classes of stock as reported in Compustat. Firms with multiple classes of stock are excluded as potential matching candidates. The sample size is 9,254 IPOs from 1980-2024, excluding IPOs with an offer price of less than $5.00, ADRs, REITs, acquisition funds, closed-end funds, banks and S&Ls, unit offers, small best efforts deals, and oil & gas limited partnerships. IPOs that are not listed on CRSP within six months of the IPO are excluded. For IPOs from 1980 and later, if book value numbers are missing so that no style-matched firm is available as a benchmark, the value-weighted market return is used for the matching firm return. Returns are measured through December 31, 2025. For partial event-years that end on this date, the last partial year is deleted from the computations. For example, for an IPO on March 15, 2024, its first-year return is included, but not the second-year return.

**Table 20-2**
**Percentage returns on IPOs from 1980-1989 during the first five years after issuing**

| | First six months | Second six months | First year | Second year | Third Year | Fourth year | Fifth year | Geometric mean years 1-5 |

| Difference | -7.4% | -3.6% | -8.1% | -6.4% | -4.8% | 8.1% | -3.7% | -3.3% |
| No. of IPOs | 1,816 | 1,812 | 1,816 | 1,728 | 1,607 | 1,439 | 1,086 | |

Returns are through December 31, 2025. Thus, the fifth-year returns are only for those IPOs from 2010 to 2020, and the fourth-year returns are only for those IPOs from 2010 to 2021, etc. Note that the fifth-year returns are available only for those IPOs that survived for at least four years.

Note: The 20171220 best efforts IPO of Dogness raised over $50 million and should not have been excluded in other tables.

**Table 21** (updated December 31, 2025)
**The Mean and Median Percentage Public Float, 1980-2025**

The public float is the number of shares issued in the IPO (not including overallotment shares) divided by the post-issue number of shares outstanding in all share classes, multiplied by 100%.

| Year | Number of IPOs | Public Float, % | | Percentiles | |
|---|---|---|---|---|---|
| | | Mean | Median | 25th | 75th |
| 1980 | 71 | 31.0 | 28.5 | 20.3 | 34.2 |
| 1981 | 192 | 27.4 | 25.5 | 20.0 | 34.4 |
| 1982 | 77 | 26.7 | 25.1 | 19.5 | 33.2 |
| 1983 | 451 | 30.0 | 28.5 | 21.9 | 35.8 |
| 1984 | 171 | 29.1 | 28.0 | 21.8 | 35.7 |
| 1985 | 186 | 32.0 | 30.7 | 23.7 | 38.3 |
| 1986 | 393 | 32.0 | 30.2 | 22.5 | 38.2 |
| 1987 | 285 | 31.5 | 29.1 | 22.0 | 39.2 |

**Table 24** (updated February 17, 2026)

## Long-run Returns on IPOs Categorized by Dual Class Status

9,253 IPOs from 1980-2024 are used, with returns calculated through the end of December 2025. IPOs with an offer price below $5.00 per share, unit offers, small best efforts offerings, ADRs, REITs, closed-end funds, natural resource limited partnerships (all of which have dual class structures), banks and S&Ls, and IPOs not listed on CRSP within six months of the offer date are excluded. Buy-and-hold returns are calculated from the first close until the earlier of the three-year anniversary or the delisting date (the end December of 2025 for IPOs from 2023 and 2024). Market-adjusted returns use the Morningstar U.S. total market index. Style adjustments use firms matched by market cap and book-to-market ratio with at least five years of CRSP listing and no follow-on equity issues in the prior five years. All returns include dividends and capital gains, including the index returns. Firms with two or more classes of shares are classified as dual class. Firms with pre-IPO convertible preferred that converted into common at the time of the IPO are classified based on the *pro forma* (post-conversion) share structure. Laura Field and Michelle Lowry supplied classifications for many of the years.

### Panel A: IPOs from 1980-2024 categorized by dual class status

| Dual class or not | Number of IPOs | Average First-day Return | Average 3-year Buy-and-hold Return | | |
|---|---|---|---|---|---|
| | | | IPOs | Market-adjusted | Style-adjusted |
| Dual class | 924 | 19.7% | 29.5% | -6.7% | -1.9% |
| Single class | 8,329 | 18.8% | 18.0% | -22.0% | -9.7% |
| 1980-2024 | 9,253 | 18.9% | 19.1% | -20.5% | -8.9% |

### Panel B: IPOs from 1980-2024 categorized by dual class and tech status

| Buyout-backed or not | Number of IPOs | Average First-day Return | Average 3-year Buy-and-hold Return | | |
|---|---|---|---|---|---|
| | | | IPOs | Market-adjusted | Style-adjusted |
| **Tech stocks** | | | | | |
| Dual class | 309 | 33.1% | 42.7% | 13.8% | 18.6% |
| Single class | 3,025 | 31.0% | 19.7% | -15.4% | -2.4% |
| All tech stocks | 3,334 | 31.2% | 21.8% | -12.7% | -0.4% |
| **Non-tech stocks** | | | | | |
| Dual class | 615 | 12.9% | 22.9% | -17.1% | -12.1% |
| Single class | 5,304 | 11.9% | 17.0% | -25.8% | -13.8% |
| All non-tech stocks | 5,919 | 12.0% | 17.6% | -24.9% | -13.7% |

**Figure 1: Percentage of Operating Company IPOs that Are Tech Stocks, 1980-2025**

This figure shows the percentage of operating company IPOs that are technology companies. The numbers are reported in Table 9.

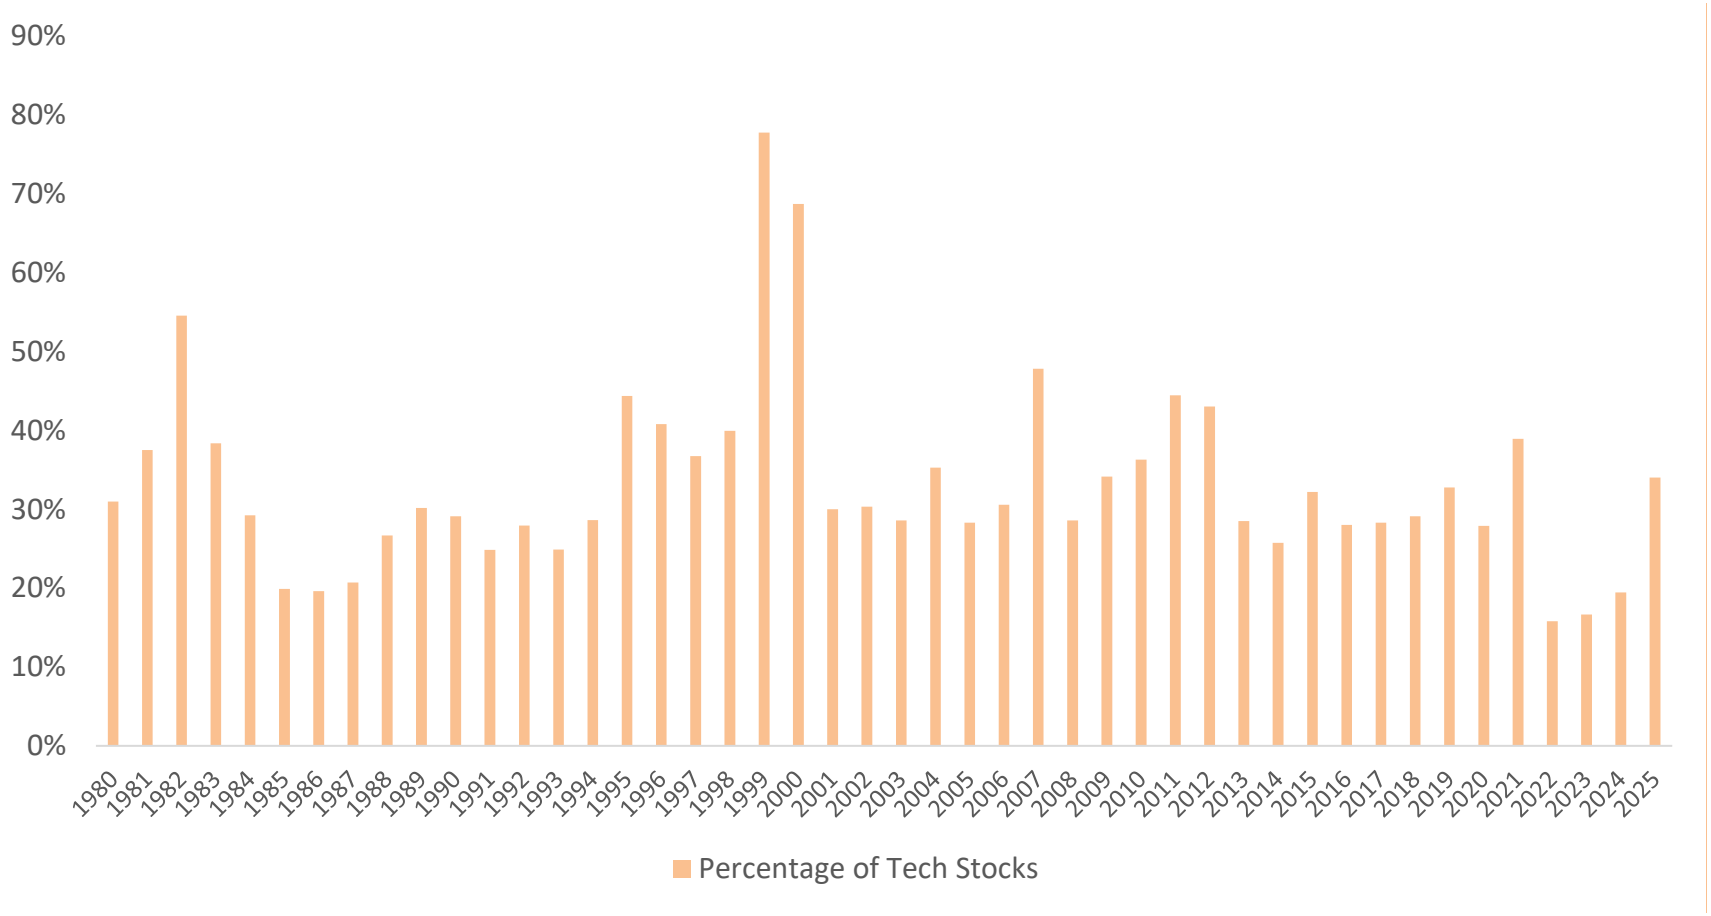

**Figure 2: Percentage of IPOs with Negative TTM Earnings, 1980-2025**

This figure shows the percentage of operating company IPOs with negative trailing twelve month (TTM) earnings, as reported in Table 9.

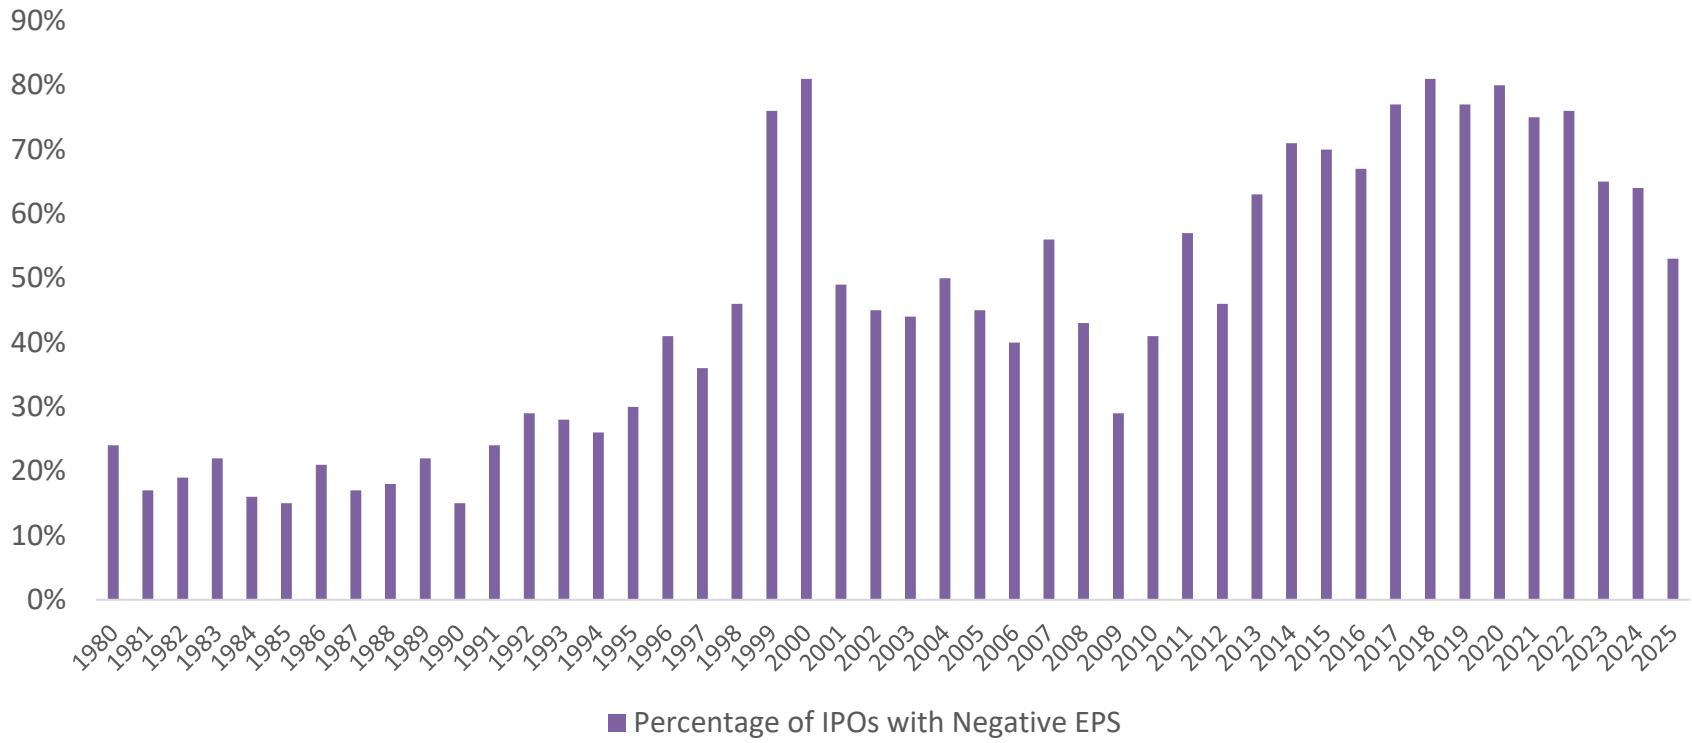

**Figure 3: Mean and Median Public Float as a Percentage of Post-Issue Shares Outstanding, 1980-2025**

The public float is the number of shares issued in the IPO divided by the post-issue number of shares outstanding in all share classes, as reported in Table 21.

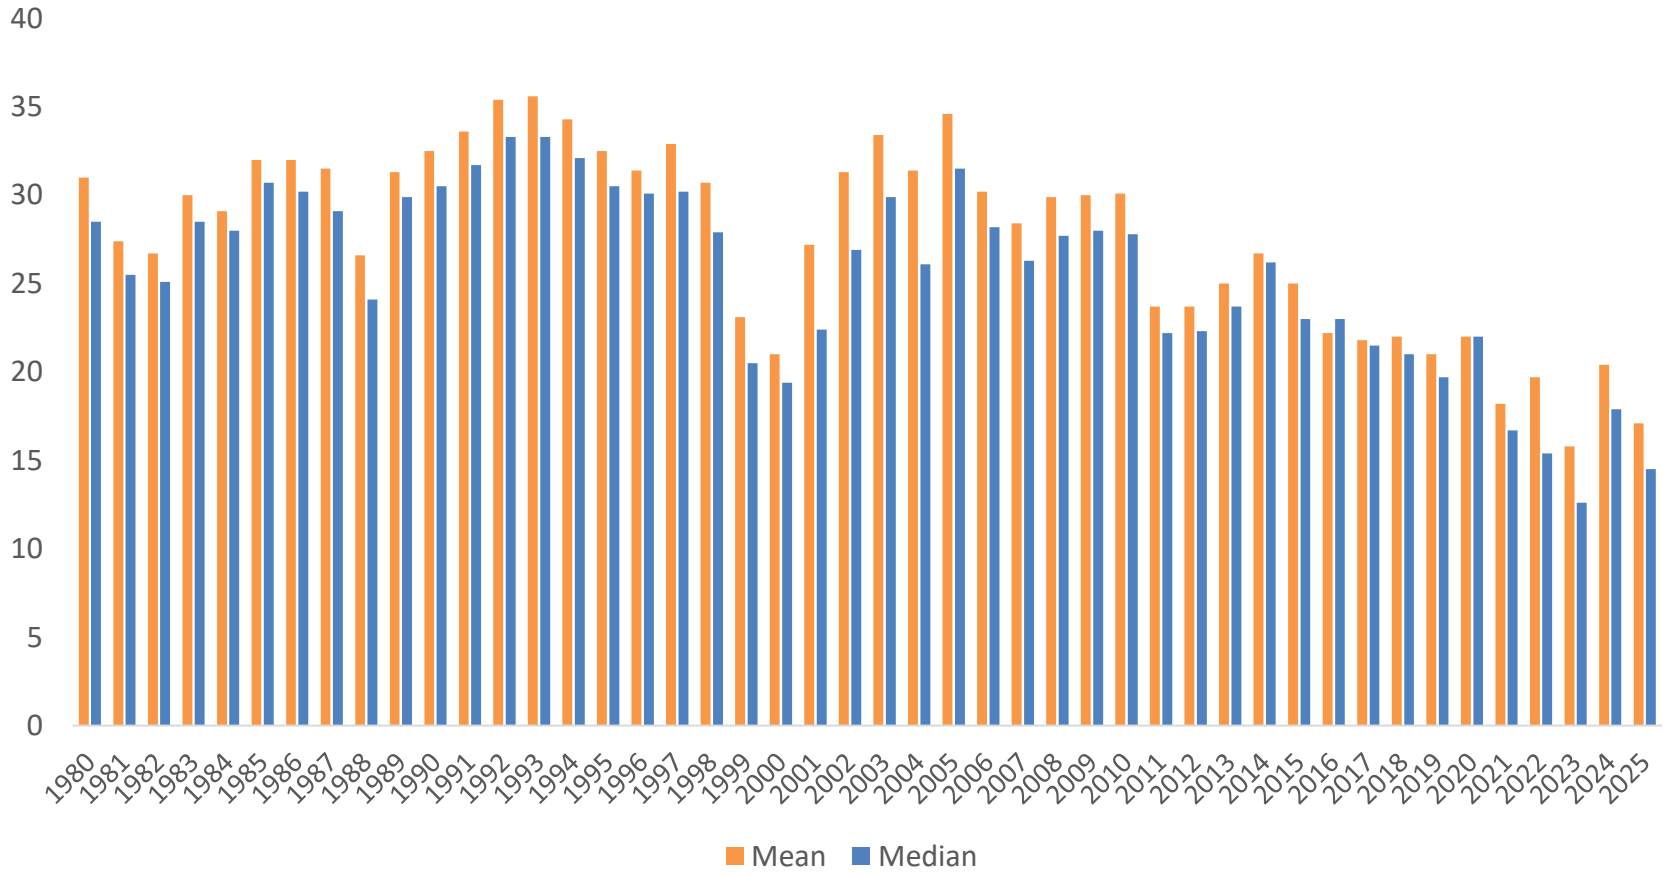

**Figure 4: Equally weighted Average Underpricing and Total Amount of Money Left on the Table**

The numbers shown in this figure are reported in Table 1.

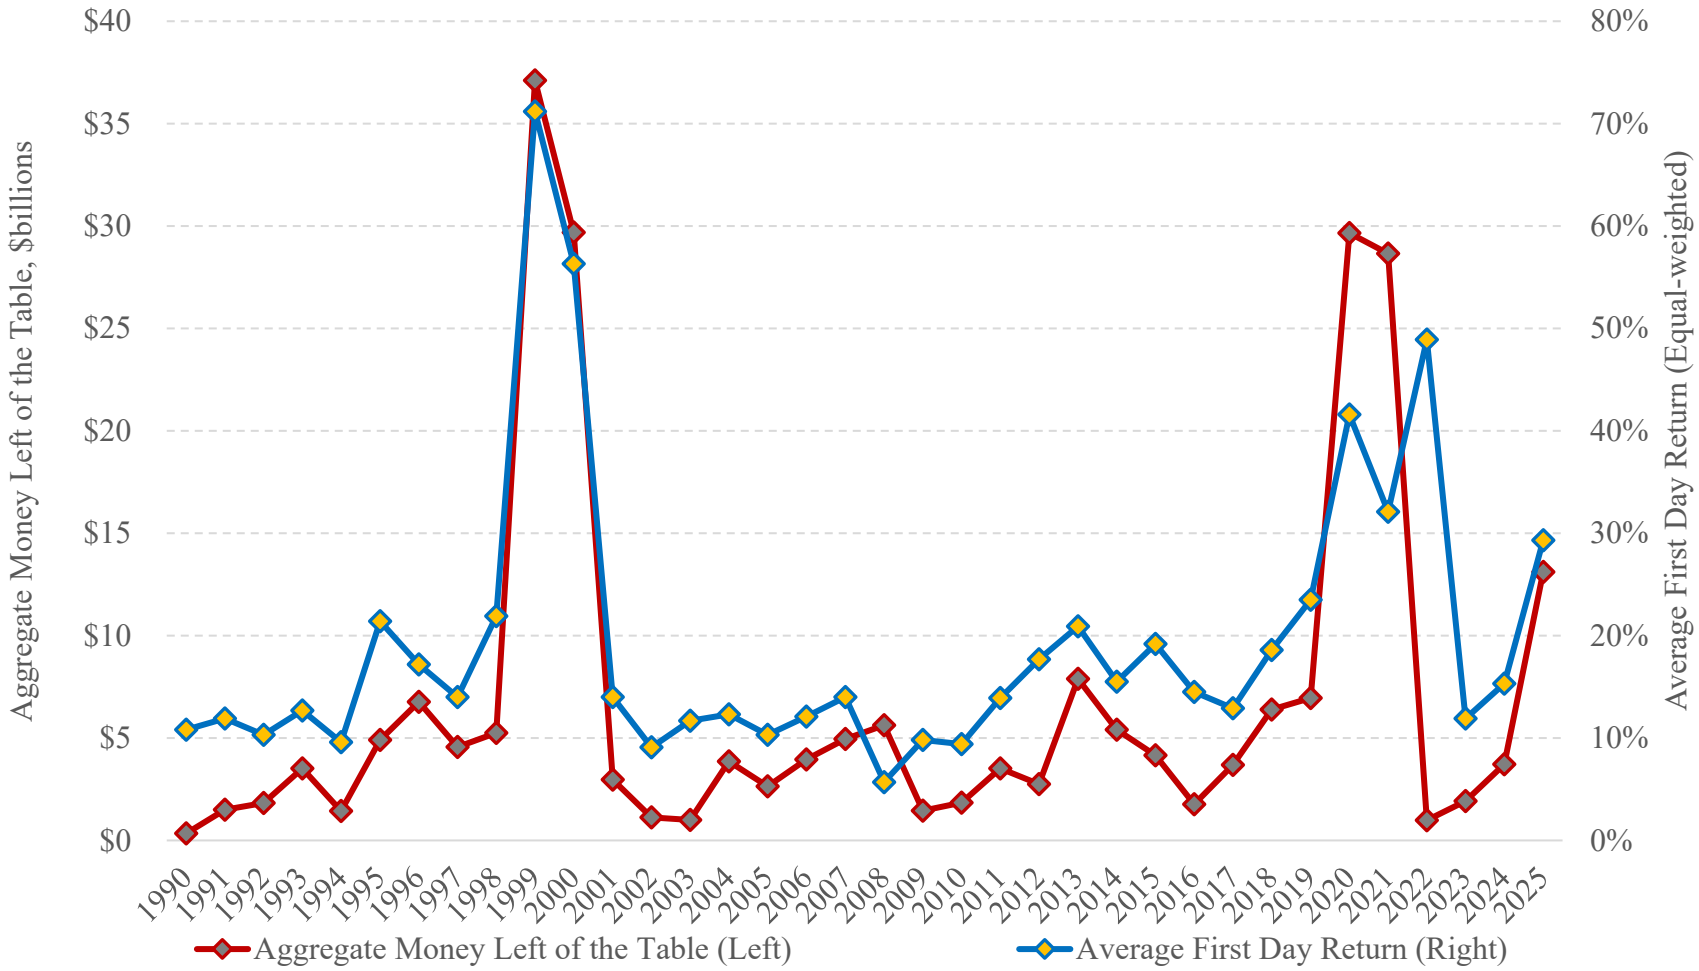

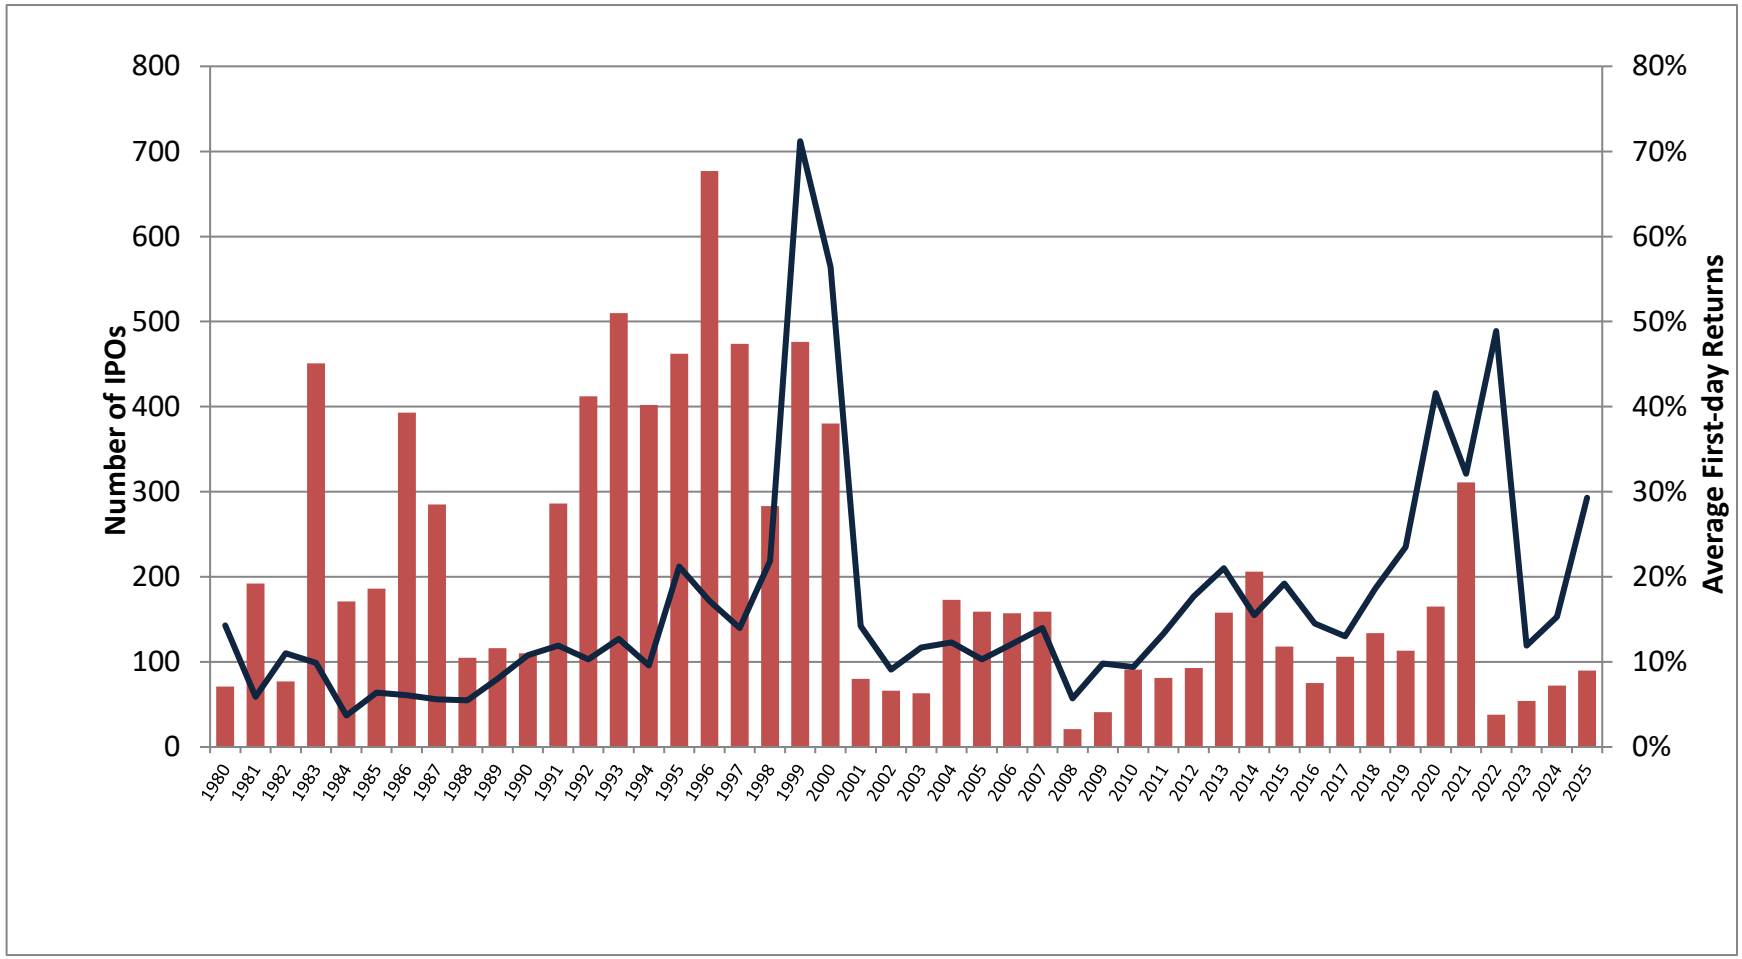

**Figure 5: The number of IPOs and average first-day returns per year, 1980-2025**

This figure shows the number of IPOs (bars) and equally weighted average first-day return, by year, for 1980-2025 for operating companies going public with traditional IPOs on major U.S. exchanges (ADRs, penny stocks, etc. are excluded), as reported in Table 1.

**Figure 6: Number and Percentage of U.S. IPOs from Chinese Companies, 1993-2025**

Table 14 reports the numbers plotted here. In this figure, ADRs are included for both the number of Chinese IPOs and the overall number of operating company IPOs. Penny stock IPOs (those with an offer price below $5 per share) are not included.
